Far and mid-infrared studies of star forming regions

Probing their thermal balance, chemistry and evolution

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
dinsdag 14 juni 2016 om 9:00 uur

door

Evgenia Koumpia

geboren op 19 maart 1984
te Athene, Griekenland

Promoters

Prof. dr. F.F.S. van der Tak

Prof. dr. P.D. Barthel

Beoordelingscommissie

Prof. dr. I.E.E. Kamp

Prof. dr. L. Kaper

Prof. dr. P. Schilke

To my 15-year-old self
"Ad astra per aspera"

Cover: Design made by Kacper H. Kieć

Published by *Gildeprint* - www.gildeprint.nl - Enschede

ISBN: 978-90-367-8888-5

ISBN: 978-90-367-8887-8 (electronic version)

Contents

1	Introduction	1
1.1	Interstellar Medium	2
1.1.1	Molecular Clouds	3
1.1.2	Photon Dominated Regions – PDRs	4
1.1.3	Heating and cooling mechanisms in PDRs	6
1.1.4	PDRs and clumpiness	7
1.2	Star Formation	8
1.2.1	High and low mass star formation	9
1.2.2	Protostellar evolution	10
1.2.3	Chemistry: hot cores and corinos	13
1.3	Long wavelength observations	14
1.3.1	Ground based observations	15
1.3.2	Stratosphere based observations – SOFIA	17
1.3.3	Space based observations – Herschel	17
1.4	Analysis–Methods	18
1.4.1	Local thermodynamic equilibrium – LTE modeling	19
1.4.2	Non–LTE modeling	21
1.4.3	Modeling the dust emission – DUSTY	23
1.4.4	Chemical models	24
1.5	This thesis	26
1.5.1	Targets	26
1.5.2	Specific questions and components of this thesis	27
2	Temperatures of dust and gas in S 140	31
2.1	Introduction	33
2.2	Observations and data reduction	34
2.2.1	PACS data	34
2.2.2	IRAM data	35
2.2.3	HIFI data	35

2.3	Observational results	36
2.3.1	Dust continuum observations	36
2.3.2	The spatial and velocity distribution of CO emission	36
2.3.3	Line profiles	38
2.4	Physical conditions	40
2.4.1	RADEX fitting	40
2.4.2	Dust analysis	45
2.4.3	Comparison of dust and gas temperatures.	47
2.5	Effect of density gradients	49
2.5.1	Dust modeling: An approach	49
2.5.2	Model grid	51
2.5.3	IRS 2 and 3	53
2.5.4	Gas modeling	55
2.6	Discussion and conclusions	59
3	Fine-structure line deficit in S 140	63
3.1	Introduction	64
3.2	GREAT observations	65
3.3	Spatial structure of the emission	67
3.3.1	Line profiles	70
3.4	Properties of the gas	77
3.4.1	Gas parameters across the GREAT map	77
3.4.2	The [C II] and [O I] peak	82
3.4.3	RADEX fit of individual sources	84
3.4.4	Cooling balance	87
3.4.5	PDR model interpretation	89
3.5	Discussion	92
3.6	Summary	94
Appendices		
3.A	Comparison to Herschel data	96
3.A.1	PACS spectroscopy	96
3.A.2	HIFI cut	100
3.B	The [O I] 145 μm /63 μm ratio	101
4	The evolutionary status of dense cores in the NGC 1333 IRAS 4 region	103
4.1	Introduction	105
4.2	Observations and data reduction	106
4.2.1	JCMT	106
4.2.2	CARMA	107
4.3	Observational results	109
4.3.1	Single dish line detections and morphology	109
4.3.2	Line profiles	113

4.3.3	Velocity structure	115
4.3.4	Interferometric continuum and line emission	117
4.4	Evolutionary constraints	119
4.4.1	Properties of the outflows	119
4.4.2	Mean envelope temperature	122
4.4.3	Mass and density	125
4.4.4	Depletion of CO	126
4.4.5	Deuteration	128
4.4.6	HCN/HNC	129
4.5	Discussion and Conclusions	130
4.5.1	Results	130
4.5.2	Discussion	131
4.5.3	Younger age scenario	132
4.5.4	Older age scenario	133
4.5.5	Conclusions and future direction	134

Appendices

4.A	Line detections towards the 3 sources	135
-----	---	-----

5 The chemical structure of NGC 1333 IRAS 4A 139

5.1	Introduction	141
5.2	Observations and data reduction	143
5.2.1	HIFI: observations and reduction	143
5.2.2	JCMT: observations and reduction	143
5.3	Observational results	144
5.3.1	Line detections	144
5.3.2	Line profiles	144
5.4	Physical conditions	146
5.4.1	LTE column densities	146
5.4.2	Deuterated species and outflows	149
5.5	Chemical structure of the envelope	153
5.5.1	RATRAM – model setup	153
5.5.2	RATRAM – model results	155
5.6	Chemical modeling	159
5.6.1	Pseudo time-dependent model	159
5.6.2	Initial abundances	161
5.6.3	Error estimations	161
5.6.4	Results	163
5.7	Conclusions and discussion	166

Appendices

5.A	Line detections towards NGC 1333-IRAS 4A	173
5.B	Chemical models for various input parameters	173

Bibliography	176
Summary	193
Samenvatting	199
