ISBN: 90-367-1440-0

“Will you walk into my parlor?” said the spider to the fly;
“‘Tis the prettiest little parlor that ever you did spy.
The way into my parlor is up a winding stair,
And I’ve many curious things to show when you are there.”

From “ The Spider and the Fly ”
by Mary Howitt (1789-1888)

Financial support by SYNTECH, Hilversum, the Netherlands, and by DENKA International, Barneveld, the Netherlands, for the publication of this thesis is gratefully acknowledged.

The research reported in this thesis was performed at the Department of Animal Physiology of the University of Groningen, the Netherlands. This study was funded by the Technology Foundation (grant GBI33.2997) of the Netherlands Organization for Scientific Research.

Cover : Nico Noorman and Dick Visser

Printed by Van Denderen, Groningen

Contents

Chapter 1	7
General introduction	
Chapter 2	21
The effects of laboratory culturing on musculure quantities on female houseflies <i>N. Noorman and C.J.den Otter</i>	
Chapter 3	41
Sexual activity and EAG responses of houseflies from strains with different musculure quantities <i>N. Noorman, G. Biancaniello and C.J.den Otter</i>	
Chapter 4	51
Effects of relative humidity, temperature and population density on the production of cuticular hydrocarbons in the housefly <i>N. Noorman and C.J. den Otter</i>	
Chapter 5	63
'Self-loading' with semiochemicals by houseflies: a new technique <i>N. Noorman and C.J. den Otter</i>	
Chapter 6	77
Radar-Doppler as a tool to measure behavioural responses to semiochemicals on female houseflies <i>N. Noorman, R. Bleumink, J.N.C. van der Pers and C.J. den Otter</i>	
Chapter 7	89
The preference for oviposition sites and the presence of an oviposition pheromone in the housefly <i>N.Noorman and C.J. den Otter</i>	
Chapter 8	99
General discussion	
References	103
Summary	111
Samenvatting	117
