Synthesis of quaternary ammonium coated surfaces

Physico-chemistry, bacterial killing and phagocytosis

Steven Roest

The printing of this thesis was sponsored by:

*Synthesis of quaternary ammonium coated surfaces:
Physico-chemistry, bacterial killing and phagocytosis*

By **Steven Roest**

Front cover: An artistic impression of a bacterium in close contact with a quaternary ammonium coated surface. **Back cover:** The same bacterium *after* contact with the coating surface.

Synthesis of quaternary ammonium coated surfaces

Physico-chemistry, bacterial killing and phagocytosis

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus, prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 14 september 2016 om 16.15 uur

door

Steven Roest

geboren op 29 april 1987
te Smalingerland

Promotores

Prof. dr. H. C. van der Mei

Prof. dr. ir. H. J. Busscher

Prof. dr. J. A. Loontjens

Beoordelingscommissie

Prof. dr. Y. Ren

Prof. dr. J.M. van Dijl

Prof. dr. A. Herrmann

Contents

Chapter 1	General introduction and aim of this thesis	1
Chapter 2	Biofilm prevention by antimicrobial coatings	5
Chapter 3	One-pot synthesis for biocompatible amphiphilic hyperbranched polyurea micelles	17
Chapter 4	A shape-adaptive, antibacterial-coating of immobilized quaternary-ammonium compounds tethered on hyperbranched polyurea and its mechanism of action	35
Chapter 5	Charge properties and bacterial contact-killing of hyperbranched polyurea- polyethyleneimine coatings with different degrees of alkylation	61
Chapter 6	Methods to compare bacterial contact-killing on cationic surfaces.	79
Chapter 7	Macrophage phagocytic activity towards adhering staphylococci on cationic and patterned hydrogel coatings versus common biomaterials	95
Chapter 8	General discussion	113
	Summary	117
	Samenvatting	121
	Acknowledgements	125
