Chemistry-based enzyme detection and inhibition in epigenetics

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 14 October 2016 at 12.45 hours

by

Maria-Eleni Ourailidou

born on 5 January 1990
 in Athens, Greece

Supervisors

Prof. F.J. Dekker

Prof. H.J. Haisma

Assessment committee

Prof. A.S.S. Dömling

Prof. P. van der Veken

Prof. J.G. Roelfes

*“...and as we wind on down the road
our shadows taller than our soul.
There walks a lady we all know
who shines white light and wants to show
how everything still turns to gold.
And if you listen very hard
the tune will come to you at last.
When all are one and one is all
to be a rock and not to roll.*

And she’s buying a stairway to heaven.”

Paranymphs

Contents

Chapter 1	Introduction and scope of the thesis	9
Chapter 2	Aqueous oxidative Heck reaction as a protein-labeling strategy	35
Chapter 3	Metabolic alkene labeling and <i>in vitro</i> detection of histone acylation <i>via</i> the aqueous oxidative Heck reaction	67
Chapter 4	Bioorthogonal metabolic labeling with acyl-CoA reporters: targeting protein acylation	107
Chapter 5	Light-controlled histone deacetylase (HDAC) inhibitors: towards photopharmacological chemotherapy	129
Chapter 6	Chemical epigenetics to assess the role of HDAC1-3 inhibition in macrophage pro-inflammatory gene expression	191
Chapter 7	Activity-based probes for detection of Lysine-Specific Demethylase-1 activity	215
Chapter 8	Summary and future perspectives	245
Appendix	Samenvatting en toekomstperspectief	255
	Acknowledgements	264
	Curriculum Vitae	268
	List of publications	269
