Social Science Genetics and Fertility

Essays on the Interplay Between Genes, Social Environment and

Human Fertility

PhD Thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 26 September 2016 at 12.45 hours.

by

Felix Christian Trops
born on 14 October 1984
in Alzenau, Germany

Supervisors

Prof. M. C. Mills

Prof. H. Snieder

Co-supervisor

Dr. N. Barban

Assessment committee

Prof. H.-P. Kohler

Prof. M. Murphy

Prof. C. H. Mulder

Contents

Introduction to social science genetics & overview of the studies	1
1.1 A biodemographic approach to fertility.....	3
1.1.1 Defining fertility	3
1.1.2 Why is a socio-genetic approach to fertility less prevalent?.....	4
1.1.3 The foundations: intermediate fertility variables/ proximate determinants	6
1.1.4 The emergence of a biodemographic approach to fertility	7
1.1.5 Measuring genetic influence: family studies, twin studies and GREML models.....	9
1.2 The chapters of this volume in the light of previous genetically informed fertility research	14
1.2.1 Heritability studies.....	14
1.2.2 Beyond heritability estimates: GxE interaction and multivariate models of fertility behaviour.....	18
1.2.3 Evolutionary Anthropology and Biology	25
1.3 Summary table of chapters in this volume.....	28
1.4 Conclusions and discussion: Limitations and fertile future research frontiers.....	32
1.4.1 Genome-wide association studies (GWAS).....	32
1.4.2 Polygenic scores (PS)	35
1.4.3 Towards truly interdisciplinary work and quality control.....	36
1.4.4 Towards more complex models of gene x environment (GxE) interaction.....	37
1.4.5 Epigenetics.....	38
1.4.6 Sex differences	38
1.4.7 A population paradox.....	39
1.4.8 Integrating new data and methods from quantitative genetics and reproductive medicine.....	40
Genetic influence on age at first birth of female twins born in the UK, 1919-68..	43
2.1 Introduction	44
2. 2 Background.....	46
2.2.1 Intergenerational correlations of fertility.....	46
2.2.2 Genetic research on human fertility	47
2.2.3 Fertility context of the UK in the 20 th century.....	49
2.3 Data & method	52
2.3.1 Data	52
2.3.2 Bio-social models and the twin design	53
2.3.3 Structural equation models.....	55
2.3.4 Historical cohort analysis.....	58
2.4 Results	59
2.4.1 Descriptive findings	59
2.4.2 Twin models.....	60
2.5. Summary and discussion	63
Human fertility, molecular genetics, and natural selection in modern societies..	71

3. 1. Introduction	72
3. 2 Towards an integrative approach in human fertility research	74
3. 3 Data & method	76
3. 3. 1 Data.....	76
3. 3. 2 Genotypes.....	77
3. 3. 3 Phenotypes.....	78
3. 3. 4. Heritability estimates	78
3. 4 Results	81
3.4.1 Descriptive findings	81
3.4.2 The correlation between AFB and NEB.....	81
3.4.3 SNP heritability of AFB and NEB.....	81
3.4.4 Bivariate GREML analysis of AFB and NEB	82
3. 5 Discussion	84
Mega-analysis of 31,396 individuals from 6 countries uncovers strong gene-environment interaction for human fertility	91
4.1 Introduction	92
4.2 Data & method	94
4.2.1 Data	94
4.2.2 GREML Models	100
4.3 Results	103
4.3.1 Descriptive findings.....	103
4.3.2 Demographic Trends.....	103
4.3.3 Genetic effects on fertility from the whole genome.....	104
4.4 Discussion	109
Is the association between education and fertility postponement causal? The role of family background factors	117
5.1 Introduction	118
5.2 Background	121
5.2.1 Education and fertility timing	121
5.2.2 Changing macro trends	122
5.2.3 Fertility postponement: Alternative explanations	123
5.2.4 Critique of education and fertility link	123
5.2.5 Biometric approaches for the education and age at first birth link.....	124
5.3 Data & method	126
5.3.1 Data	126
5.3.2 Analysis	127
5.4 Results	131
5.4.1 Descriptive findings.....	131
5.4.2 The causal effect of education on age at first birth	134
5.4.3 The role of genes and the environment as family background factors	139
5.5 Discussion	141
Literature	145
