(Epi)genetic characterization of chemotherapy response in ovarian cancer:

Finding better markers, models and targets for therapy

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Monday 10 October 2016 at 12.45 hours

by

Tushar Tomar

born on 28 October 1987
 in Jalandhar, India

Supervisors

Prof. dr. S. de Jong

Prof. dr. A.G.J. van der Zee

Co-supervisor

Dr. G.B.A. Wisman

Assessment committee

Prof. dr. E.M.J.J. Berns

Prof. dr. H.J.M Groen

Prof. dr. J.J. Schuringa

Dedicated to My Parents and Beloved Wife

Paranymphs

Gert Jan Meersma

Contents

Chapter 1	General introduction to the thesis	9
Chapter 2	Genome-wide integrated epigenomics analysis identifies <i>FZD10</i> for platinum sensitivity in ovarian cancer	23
Chapter 3	Checkpoint Kinase 2 (Chk2) supports sensitivity to platinum-based treatment in high-grade serous ovarian cancer	49
Chapter 4	Biobanking of patient and patient-derived xenograft (PDX) ovarian tumour tissue: efficient preservation with low and high FCS based methods	65
Chapter 5	Genome-wide methylation profiling of ovarian cancer patient-derived xenograft (PDXs) treated with the demethylating agent decitabine identifies novel epigenetically regulated genes and pathways	91
Chapter 6	Dual wavelength near-infrared fluorescence imaging of VEGF and IGF-1R in ovarian cancer patient-derived xenografts	117
Chapter 7	Functional genomic mRNA profiling identifies novel platinum chemoresponse-associated genes in high grade serous ovarian cancer	145
Chapter 8	Summary, discussion and future Perspectives	165
Chapter 9	Nederlandse Samenvatting	175
Appendices	Curriculum Vitae	184
	List of Publications	188
	List of Abbreviations	190
	Acknowledgements	193
