# Contents

|                   |   |            |
|-------------------|---|------------|
| <b>Chapter 1</b>  | Introduction to the thesis  | 9          |
|                   | <b><i>Part one: Assessment of the perception of music and pitch-mediated speech stimuli in cochlear-implant users</i></b>             | <b>23</b>  |
| <b>Chapter 2</b>  | Music and quality of life in early-deafened late-implanted adult cochlear-implant users   | 25         |
| <b>Chapter 3</b>  | Self-reported music perception is related to quality of life and self-reported hearing abilities in cochlear-implant users            | 43         |
| <b>Chapter 4</b>  | Gender categorization is abnormal in cochlear-implant users   | 61         |
| <b>Chapter 5</b>  | Normal-hearing listeners' and cochlear-implant users' perception of pitch cues in emotional speech                                    | 83         |
|                   | <b><i>Part two: Musician effect in normal hearing listeners and cochlear-implant users</i></b>  | <b>105</b> |
| <b>Chapter 6</b>  | Musical background not associated with self-perceived hearing performance or speech perception in post-lingual cochlear-implant users | 107        |
| <b>Chapter 7</b>  | Musician effect in cochlear implant simulated gender categorization   | 125        |
| <b>Chapter 8</b>  | The musician effect: does it persist in spectrally degraded cochlear implant simulations?   | 135        |
|                   | <b><i>Part three: The effect of music therapy and training in cochlear-implant users</i></b>  | <b>167</b> |
| <b>Chapter 9</b>  | The effect of musical training and music therapy on speech and music perception in cochlear-implant users                             | 169        |
| <b>Chapter 10</b> | General discussion and conclusion   | 197        |
|                   | Summary & Samenvatting  | 211        |
|                   | Dankwoord   | 219        |
