Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

Cover art: Hexagon composition with two lines

design by the author

inspired by “Ruitvormige compositie met twee lijnen”, by Piet Mondriaan (1931)

ISBN: 978-90-367-9222-6

Published by *Ipskamp Drukkers B.V.* - www.ipskampprinting.nl - Enschede

supported by NanoNed, the Zernike Institute for Advanced Materials, stichting Fundamenteel Onderzoek der Materie (FOM), the Deutsche Forschungsgemeinschaft and the European Union 7th Framework Programmes “ConceptGraphene” (project nr. 257829) and “Graphene Flagship” (project nr. 604391).

rijksuniversiteit
groningen

Spintronics and thermoelectrics in exfoliated and epitaxial graphene

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 14 oktober 2016 om 14.30 uur

door

Jan Jasper van den Berg

geboren op 23 februari 1985
te Groningen

Promotor

Prof. dr. ir. B.J. van Wees

Beoordelingscommissie

Prof. dr. ir. C. H. van der Wal

Prof. dr. ir. R. A. Hoekstra

Prof. dr. S. Roche

Contents

1	Introduction and outline	1
1.1	Scope of this thesis	4
1.2	Outline	4
	References	6
I	Background	7
2	Spin transport	9
2.1	Spin diffusion	11
2.2	Spin relaxation	12
2.3	Spin transport schemes	14
2.3.1	The nonlocal spin valve	14
2.3.2	Other spin transport schemes	19
2.4	Spin precession	22
2.5	Spin transport in graphene	25
	References	28
3	Thermal and thermoelectric transport in graphene	33
3.1	Thermoelectric effects	33
3.2	Thermal and thermoelectric transport properties of graphene	37
3.2.1	Thermal transport properties of graphene	37
3.2.2	Thermoelectric experiments in graphene	41
	References	44
4	Epitaxial graphene on silicon carbide	47
4.1	Growth	47
4.1.1	The silicon carbide substrate	48
4.1.2	Growth mechanisms	50

4.2	Properties	52
4.2.1	Effect of the buffer layer	53
4.2.2	Polytypes	53
4.2.3	Crystal face	53
4.2.4	Hydrogen intercalation	54
4.2.5	Ferromagnetism	55
4.3	Applications	55
	References	58
II Experimental results		63
5	Long spin relaxation times in wafer scale epitaxial graphene on SiC(0001)	65
5.1	Introduction	65
5.2	Sample Fabrication	66
5.3	Spin Transport	67
5.4	Conclusions	74
	References	74
6	Localized states influence spin transport in epitaxial graphene	77
6.1	Introduction	77
6.2	Spin transport model	79
6.3	Comparison of the model with spin transport data	81
6.4	Conclusions	84
	References	84
	Supplementary information	85
7	Observation of anomalous Hanle spin precession lineshapes resulting from interaction with localized states	87
7.1	Introduction	87
7.2	Materials and methods	89
7.3	Room temperature spin transport	91
7.4	Anomalous Hanle curves at low temperatures	92
7.5	Conclusions	95
	References	95
	Supplementary information	96
8	Hanle precession in the presence of energy dependent coupling between localized states and an epitaxial graphene spin channel	99
8.1	Introduction	99
8.2	Localized states model	100
8.2.1	Extension of the model: localized states with varying coupling rate	101

8.3	Inverse power-law distribution for $\mathcal{F}(\Gamma)$	104
8.4	Simulations	105
8.5	Discussion and conclusions	107
	References	108
	Supplementary information	109
9	Spin transport in epitaxial graphene on the C-terminated (000$\bar{1}$)-face of silicon carbide	111
9.1	Introduction	111
9.2	Room temperature measurements	115
9.3	Temperature dependence of the spin transport properties	116
9.4	Conclusions	119
	References	119
	Supplementary information	120
10	Direct electronic measurement of Peltier cooling and heating in graphene	123
10.1	Concept and novelty	123
10.2	Results	124
10.2.1	Device architecture	124
10.2.2	Thermoelectric measurements	125
10.3	Discussion	127
	References	133
	Supplementary information	134
	Appendix: experimental methods	141
	Summary	147
	Uitgebreide Nederlandse samenvatting	151
