Healthy Aging in Context

Family, Welfare State and the Life Course

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Thursday 27 October 2016 at 11.00 hours

by

Maja Djundeva

born on 23 August 1986
in Skopje, Macedonië

Supervisors

Prof. M.C. Mills

Prof. R.P.M. Wittek

Assessment Committee

Prof. K.U. Mayer

Prof. U. Bültmann

Prof. M. Silverstein

Contents

List of tables.....	9
List of appendix tables.....	9
List of figures.....	10
1. Introduction.....	11
1.1 Research problem and background.....	11
1.1.1 Partnership and health	11
1.1.2 Parenthood and health.....	12
1.1.3 Disciplinary boundaries.....	13
1.2 Questions addressed in this book.....	13
1.3 Research design and contribution: A life course perspective on health and family.....	15
1.4 Theoretical approaches and mechanisms.....	17
1.4.1 Cumulative advantage/disadvantage theory (Life course mechanism).....	17
1.4.2 Stress response theory (Physiological mechanism).....	17
1.4.3 Psychosocial factors (Psychological mechanism)	18
1.5 Data and analytic strategy	19
1.5.1 Data.....	19
1.5.2 Analytic strategy.....	21
1.6 Overview of chapters.....	22
2. A life course approach to the relationship between childhood health and partnership trajectories.....	27
2.1 Introduction	28
2.2 Theoretical background	30
2.2.1 The selection into non-standard partnership trajectories.....	30
2.2.2 The influence of early childhood health on family processes.....	32
2.3 Data and Methods	34
2.3.1 Data.....	34
2.3.2 Measurement of variables	34
2.3.3 Analytical strategy	37
2.4 Results.....	37
2.4.1 Description of partnership trajectories.....	37
2.4.2 Multinomial Logistic Regression Results.....	44

2.5	Sensitivity analyses	47
2.6	Conclusion and discussion	47
2.7	Appendix	49
3.	Partnership trajectories and cardiovascular health in late life.....	53
3.1	Introduction	54
3.2	Background	54
3.3	Data and methods.....	55
3.3.1	Data.....	55
3.3.2	Analytical strategy	59
3.4	Results.....	59
3.4.1	The association of life course partnership and CVH indicators in Germany.....	59
3.4.2	The association of life course partnership and CVH indicators in England	61
3.5	Sensitivity analyses.....	62
3.6	Conclusion and discussion	64
3.7	Appendix	66
3.7.1	Imputation procedure	66
3.7.2	Technical notes on sequence analyses.....	67
3.7.3	Coding of confounding variables.....	68
3.7.4	Cohabitation as a distinct period in partnership trajectories.....	68
4.	Age at first birth and late-life self-rated health.....	75
4.1	Introduction	76
4.2	Theoretical background	78
4.2.1	Age at first birth and health outcomes for women	78
4.2.2	Education in European context.....	79
4.3	Data and methods.....	81
4.3.1	The GSEM model.....	82
4.3.2	Data.....	84
4.4	Results.....	87
4.5	Sensitivity analyses.....	90
4.6	Conclusion and discussion	91
4.7	Appendix	97
4.7.1	Technical description of a GSEM model.....	97
5.	Receiving instrumental support in late parent-child relationships and parental depression.....	101

5.1	Introduction	102
5.2	Theoretical background	104
5.2.1	Self-determination theory: Receiving instrumental support and mental health.....	104
5.2.2	Depression and instrumental support in a European context	104
5.2.3	Physical needs and depression	105
5.2.4	Gender and instrumental support.....	106
5.2.5	Social interaction with adult children and depressive mood	106
5.3	Method	107
5.3.1	Data and sample	107
5.3.2	Analytical strategy	109
5.4	Results.....	111
5.4.1	Descriptive results	111
5.4.2	Multivariate results	112
5.5	Sensitivity analyses.....	117
5.6	Conclusion and discussion	117
5.7	Appendix	120
5.7.1	Control variables	120
5.7.2	Coding of control variables.....	121
5.7.3	Marginal effects.....	121
6.	Conclusion	127
6.1	Contribution of this book.....	127
6.1.1	Life course epidemiology and the study of family.....	127
6.1.2	Application of cumulative advantage theories	127
6.1.3	Theoretical underpinnings of sequence analyses	128
6.1.4	The role of welfare regimes in health differentials.....	128
6.1.5	Gender differences in health.....	129
6.2	Contribution of empirical chapters.....	129
6.2.1	A life course approach to the relationship between childhood health and partnership trajectories	129
6.2.2	Partnership trajectories and cardiovascular health in late life	130
6.2.3	Age at first birth and late-life self-rated health	130
6.2.4	Receiving instrumental support in late parent-child relationships and parental depression	130

6.3	Summary of main findings	131
6.4	Methodological implications	133
6.5	Policy implications	134
6.6	Implications for future research: On data ethics in investigating public health.....	135
	Bibliography	137
	Nederlandse samenvatting.....	167
	Acknowledgements	173
	ICS Dissertation Series	175
	About the author.....	191

List of tables

Table 1.1: Datasets used in the empirical chapters.....	20
Table 1.2: Overview of chapters	23
Table 2.1: Descriptive statistics of the sample used in the regression analysis	38
Table 2.2: Relative risk ratios of the multinomial logistic regression model (ref: stably married)	41
Table 2.3: Relative risk ratios of the multinomial logistic regression model for birth cohort (reference group: stably married).....	46
Table 3.1: Descriptive sample statistics	58
Table 4.1: Composition of working sample and sample characteristics for self-rated health, education and age at first birth	85
Table 4.2: Estimates from a three-part generalized equation model	93
Table 5.1: Sample characteristics of parents older than 65 with at least one non-resident adult child.....	110
Table 5.2: Logistic regression of the Association between Depressive Mood and Instrumental Support from Adult Children.....	115
Table 6.1: Summary of main findings.....	132

List of appendix tables

A 2.1: Ten most common sequence patterns of partnership transitions	49
A 2.2: Partnership trajectories classification.....	50
A 2.3: Relative risk ratios of the multinomial logistic regression model (reference group: stably married).....	52
A 3.1: Descriptive statistics of non-imputed data	69
A 3.2: Sequence patterns in partnership trajectory groups for Germany	70
A 3.3: Sequence patterns in partnership trajectory groups for England	71
A 3.4: Ten most common sequences over the life course.....	71
A 3.5: Baseline differences of biomarkers in non-imputed data (Germany).....	72
A 3.6: Baseline differences of biomarkers in non-imputed data (England)	73
A 4.1: Measures of fit for models with mediation and models without mediation of AFB and education.....	99
A 4.2: Indirect and total effects of age at first birth and education on health.....	99
A 5.1: Logistic regression of the Association between Depressive Mood and Instrumental Support from Adult Children	123

List of figures

Figure 1.1: Conceptual framework.....	19
Figure 1.2: Countries in SHARE and ELSA	20
Figure 2.1: Frequency of partnership trajectories by country for men (%)	40
Figure 2.2: Frequency of partnership trajectories by country for women (%)	40
Figure 2.3: Frequency of partnership trajectories by cohort for men and women (%) ...	45
Figure 3.1: Odds ratios for HbA1c for Germany	60
Figure 3.2: Odds ratios for TC for men in Germany	61
Figure 3.3: OLS estimate for CRP log for England.....	62
Figure 3.4: Odds ratios for HbA1c for England	63
Figure 3.5: Odds ratios for systolic BP for England.....	63
Figure 3.6: Odds ratios for diastolic BP for England.....	63
Figure 3.7: Odds ratios for TC for men in England	63
Figure 4.1: Generalized structural equation path model	83
Figure 4.2: Indirect and total effects of age at first birth and education on health	88
Figure 5.1: Effects of ADL and instrumental support on depressive mood.....	112
Figure 5.2: Effects of gender and instrumental support on depressive mood	114
