Acknowledgements

My deepest gratitude goes to my supervisor Prof. Erik van der Giessen. To be honest, Erik was the only reason I came to Groningen from Tsinghua. I did enjoy working with Erik in the past four years, though there were two times he lost his patience on me because I did not answer his questions directly. I still remember four years ago, when I started my PhD, I even did not know how to use Linux system, let make/debug programs alone. Erik came to my office and sat besides me, guided me to make programs. Erik gave me enough freedom on research, this leads me to be an independent researcher with my own thoughts instead of being a well equipped machine. His profound knowledge, rigorous academic attitude, truth-seeking spirit not only make me feel confident about my work, but also inspire me to become a good researcher. I can not find the words that could express how cool and how proud I felt working with you, Erik.

Next, I would like to thank members of the reading committee, Prof. George Palasantzas at University of Groningen, Prof. Jean-François Molinari at EPFL, Switzerland and Prof. Amine Benzerga at Texas A&M University, for evaluating my thesis and giving comments and suggestions.

I thank Prof. Xiaoming Liu at Chinese Academy of Sciences. Xiaoming is a good friend of mine. He introduced me to Erik and took me to Groningen on September 1st, 2012. He helped me a lot especially in the early stage of my PhD, both on research and life. Our friendship and scientific research cooperation will never end.

I thank Prof. Stefanos Papanikolaou at West Virginia University. I had a lot of discussions with Stefanos when he was in Groningen, both about research and life. Chapter 3 could not have been written without the help and inspiration from Stefanos. We also have good memory about pizza, dinner and pool. Thank you for providing me a postdoc position at Johns Hopkins University and I am looking forward to working with you.

A special thanks is dedicated to my paranymphs, Zhao Peiliang and Tarun Katiyar, for helping me take care of the preparations for the public defense ceremony. I would like to thank Arjan Boerma for helping me translate the Dutch summary.

Even though I am not a societal guy, there is still a huge list of people that have made my life in Groningen great and full of good memory. In case I forget to men-

tion some of them that will make me regret later, I will not try to list them individually. Weekend Chinese basketball group enriched my life, though my weight keeps increasing. With μ -Mech group, I had a great time during group lunch (though I rarely appeared because of my combination of lunch and dinner), cake, dinner, nerd dinner, Christmas dinner (my favorite food the is apple pie made by Patrick and Susanne). The trip organized by Welcome International Researchers and Employees took me to many beautiful and nice places of the Netherlands.

A group of friends that certainly deserve a special treatment. Sandeep, Ali, Liu Ling and Zhou Zhiwei, Jennifer Yang, Chen nian, Zhao Peiliang and Xing lijuan, Wu jing, Liu qi, Sun Fengwei, Sun Bo and Huang min. I wish you all the best in future and hope to see you again.

At the end, I would like to thank my parents, for all the support and encouragement throughout my life. A special thanks is given to Yang Xiao, I can not imagine what kind of person I would be today without your encouragement and accompany in the past five years. I wish you happiness forever.

回首向来萧瑟处，
归去，也无风雨也无晴
