The second sex

Functions and mechanisms of sperm manipulation
in female *Drosophila melanogaster*

KONINKLIJKE NEDERLANDSE
AKADEMIE VAN WETENSCHAPPEN

This research has been carried out in the Evolutionary Genetics, Behaviour and Development (EDGB) group at the Groningen Institute for Evolutionary Life Sciences (GELIFES) according to the requirements of the Graduate School of Science (Faculty of Mathematics and Natural Sciences, University of Groningen, The Netherlands).

This research was supported by an Open Programma grant from the Dutch Organization for Scientific Research (NWO) awarded to J.-C. Billeter (reference: 821.02.020). Additional support was received from the research school of Behavioural Cognitive Neuroscience (University of Groningen, The Netherlands) and Dobberke Stichting.

The Second Sex

**Functions and mechanisms of sperm manipulation in female
*Drosophila melanogaster***

PhD Thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Thursday 8 December 2016 at 09.00 hours

by

Meghan Elizabeth Laturney

born on 25 March 1985
in Kitchener, Canada

Supervisor

Prof. dr. J.-C. Billeter

Assessment Committee

Prof. dr. L.W. Beukeboom

Prof. dr. O.C.M. Sibon

Prof. dr. M.F. Wolfner

Table of Contents

General Introduction.....	7
Neurogenetics of female reproductive behaviour in <i>Drosophila melanogaster</i>	23
<i>Drosophila melanogaster</i> females restore their attractiveness after mating by removing anti-aphrodisiac pheromones	67
Last male sperm precedence is modulated by female mating rate in <i>Drosophila melanogaster</i>	105
Neurogenetics of sperm storage in <i>Drosophila melanogaster</i>	131
Neurogenetics of sperm ejection in <i>Drosophila melanogaster</i>	175
Synthesis	205
References	215
Appendix	249
Nederlandse Samenvatting.....	251
Summary in English.....	255
Acknowledgements.....	261
