Pleasure from Food

Different perspectives on aging

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
woensdag 30 november 2016 om 14.30 uur

door

Heleen Rianne Hoogeveen

geboren op 6 juni 1989
te Gaasterlân-Sleat

TABLE OF CONTENT

1 General Introduction
Page 9

Part 1 Processing information from basic tastes – fMRI studies

2 Amylase concentration and viscosity of saliva are linked to brain responses during taste processing in young and older adults (*Submitted*)
Page 21

3 Neural processing of basic tastes in young and older adults – an fMRI study (*Published in NeuroImage*)
Page 39

4 Functional specialization of the male insula during taste perception (*Published in NeuroImage*)
Page 61

5 Increased functional connectivity between hedonic networks in older compared to young adults during taste processing (*Submitted*)
Page 81

Part 2 Processing information from food pictures – EEG studies

6 Beyond liking and disliking: subtle differences in food liking are reflected in electrical brain activity (*Submitted*)
Page 99

7 Brain potentials highlight stronger implicit food memory for taste than context associations (*Published in PLoS ONE*)
