Copyright

Other than for strictly personal use, it is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), unless the work is under an open content license (like Creative Commons).

The publication may also be distributed here under the terms of Article 25fa of the Dutch Copyright Act, indicated by the "Taverne" license. More information can be found on the University of Groningen website: <https://www.rug.nl/library/open-access/self-archiving-pure/taverne-amendment>.

Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

Propositions :

1. Living together make us stronger (Chapter 2)
2. Mussels shape their own world, to make it a better place (Chapter 2-3)
3. In any restoration program that encompasses the transplantation of organisms from a different environment, it is important to study their adaptation to this new environment before scaling up (Chapter 4)
4. One cannot build an ecosystem (Chapter 4-5)
5. A person who never made a mistake never tried anything (Einstein & chapter 4)
6. Adaptation in nature not only implies being adapted to the environment, but also adapting the environment to oneself. (following A.V. Lapo)
