Acknowledgements

It would not be possible to complete this thesis without the kind assistance and considerable support from many people. I would like to give my sincere thanks to them.

First of all, I would like to express my deepest appreciation to my promoter Prof. Johan Woltjer. His in-depth overview of institutions and sustainable governance, from both theoretical and empirical perspectives, has fundamentally promoted innovative thoughts in me. His considerable experiences and insights were helpful to clarify all the core arguments of this thesis and provide practical suggestions. I enjoyed our discussions on the sharp criticisms from referees against my submitted manuscripts, which are valuable learning processes. Without his patience and encouragement, it is impossible for me to hold out through so many bitter required revisions. I am grateful for his efforts and time allocated to me, especially after his moving to the UK. I hope in the future, my research attempts will continue to benefit from his solid knowledge and support.

I am also extremely grateful to my daily supervisor Dr. Margo van den Brink, who gave me a great deal of help and considerations on both research and life. Her wonderful abilities of simplifying and structuring written articles and her rich experience on qualitative analysis influenced me greatly. I really appreciate her excellent suggestions on coordinating several tasks to improve the efficiency of my work. Her empathy and care were also a great support. I admire her for her intelligence as a researcher as well as her dedication to family as a mother.

My special thanks go to Prof. Gert de Roo, who provided me opportunities to get access to so many brilliant visiting scholars from China, broadening my knowledge about Chinese planning and architecture. I benefited a lot from our casual chats, which made me realize the importance of independence and interests in doing research. Moreover, I really appreciate his help for receiving financial support from PUMAH project, which made all the data from the fieldwork possible.

I would like to express my appreciation to my colleagues in FRW, who create the most inspiring, international, interdisciplinary, and supporting environment. I have very pleasant and rewarding experiences of conducting fieldwork with Ward in Wuhan and I am grateful for his trust and consideration. Many thanks go to Chris, Femke, and Constanza for the stimulating conversations when I was lost in developing theoretical bases. I enjoyed my first international conference in Dublin with the help from Melanie, Britta, and Jessica; and enjoyed too all the courses and workshops in Utrecht and Groningen with Marije, Mita, and Taufiq, as well as the interaction between my discussant Jasper during URSI conference. I appreciate their experience sharing, useful suggestions, mutual understanding, and mental stimulation since we started our own research more or less within a same period and continue to grow into researchers together. Similar encouragement and consolation are also from Kitty, Wendy, Elen and Tim, which are worth my thanks too. I am so lucky to have Karina as my roommate. Her vibrant plants, photos, and personality make the tough working days very pleasant. I truly appreciate all the good wishes that she left on the white board for me. Uma also has provided me much pleasant help, as she is a good travel partner and a patient listener. Special thanks to Sarah and Diana for kindly addressing many tiny daily-life issues from translating Dutch mails to making complaints about water leakage. Their help made my stay in

Groningen easier. I should not forget to thank Hiska, Eduardo, Niels, and Arjan for their willingness to share their past or current working experiences, which are very interesting. Sincere thanks to other colleagues in the planning department that I did not mention; all of you helped me in different ways. I also gratefully acknowledge the support from the Graduate School of Spatial Science, especially Prof. Clara H. Mulder, Prof. Inge Hutter, and Alida for their help in administrative and financial stuff.

All my Chinese colleagues and friends have made my life in the Netherlands enjoyable. I need to thank Rongdi, Yang, Bo, and Xiaolin for helping each other to get used to the living and working environment. The scenes of our tough first-year life are still clear in mind. Thanks for all your wholehearted support in those years. Shuhai, Honghao, Jianjun, and Lei have been very helpful when I first arrived in Groningen, conduct research, finalize thesis, and find jobs. Although some friends had stayed in Groningen only for a short period, such as Nan Niu, Nannan Yu, Jinxing Yue, Hongzan Jiao, Tianying Song, Mengjie Xu, Wanxuan Wang, and Yuhan Xie, I had excellent memories of our chats, jokes, dinner parties, short travels, sports, and working experiences. Thanks Jing for sharing some opinions and feelings with me. Thanks Dr. Xiangnan Liu for providing suggestions for my job application. I also express my gratitude to many other Chinese friends who helped me in various ways: Qi Wang, Jinfeng Shao, Huijie Sun, Wangli Cheng, Pu Yang, Guangxing Zhu, Yan Shao, Peng Wang, Mengmeng Zhang, Qingkai Yang, Peipei Wu, Wenjun, Tao Zhang, Huifang Yin and other friends I did not mention.

My sincere thanks should go to Koos Kuiper – my squash coach – for inspiring my confidence when I felt extremely frustrated and exhausted in my second year. He asked me not to impose strict requirements on myself at the beginning; it is patience, practice, and persistence that create a good player.

Finally, my deepest and earnest gratitude is due to my parents. My mother's patience, kindness, and positive attitude to life, as well as my father's great perseverance and dedication in his career continue to inspire me. Their unconditional love, listening, and understanding have always been solid support. I am thankful to Uncle Peng and Uncle Bin for their consideration. I must show my sincere thanks to my Aunt Wang and Uncle Wang, their continuous support and guidance enable me to seize many chances and promote myself to better stages. I also owe a huge debt of gratitude to Yongfu Li. Many thanks for his great support in my fieldwork as a close friend at the beginning, also for his great patience and efforts for maintaining our long distance relationship as my boyfriend during the later years.

Lastly, I am thankful to the Chinese Scholarship Council for supporting my PhD research in Groningen.

Ruiqian Li
