Parental and endosymbiont effects on sex determination in haplodiploid wasps

Who is in control?

Elzemies Geuverink

The research described in this thesis was carried out in the Evolutionary Genetics group at the Centre for Ecology and Evolutionary Studies (CEES) and from 2015 onwards at the Groningen Institute for Evolutionary Life Sciences (GELIFES) of the University of Groningen, The Netherlands, according to the requirements of the Graduate School of Science (Faculty of Science and Engineering, University of Groningen).

This work was funded by grant number ALW 854.10.001 of the Netherlands Organization for Scientific Research (NWO) to Leo W. Beukeboom. The printing of this thesis was supported by the University of Groningen and the Faculty of Science and Engineering.

Parental and endosymbiont effects on sex determination in haplodiploid wasps

Who is in control?

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 24 March 2017 at 11.00 hours

by

Elzemie Geuverink

born on 15 February 1985
in Enschede

Supervisor

Prof. L.W. Beukeboom

Co-supervisors

Dr. L. van de Zande

Dr. E.C. Verhulst

Assessment committee

Prof. M. Beye

Prof. J. Ellers

Prof. J.C. Billeter

Contents

Chapter 1	General introduction	7
Chapter 2	Phylogenetic distribution and evolutionary dynamics of the sex determination genes <i>doublesex</i> and <i>transformer</i> in insects	23
Chapter 3	Maternal provision of <i>transformer-2</i> is required for female development and embryo viability in <i>Nasonia vitripennis</i>	41
Box 1	Nomenclature of genes and splice variants	63
Chapter 4	Alternative splicing and maternal provision of sex determination genes in the parasitoid <i>Asobara tabida</i>	65
Chapter 5	The <i>transformer</i> gene is duplicated in <i>Leptopilina clavipes</i> and regulated differently in arrhenotokous and <i>Wolbachia</i> -induced thelytokous individuals	93
Chapter 6	Identification, sex-specific splicing and maternal provision of <i>transformer</i> and <i>transformer-2</i> in arrhenotokous and <i>Wolbachia</i> -infected thelytokous <i>Asobara japonica</i>	111
Chapter 7	General discussion	131
Box 7.1	The identification of <i>tra2</i> , <i>tra</i> and <i>dsx</i> and their ever-transforming nomenclature	137
Box 7.2	DNA methylation as a possible epigenetic control of sex determination	143
	Bibliography	151
	English summary	173
	Dutch summary	179
	Curriculum vitae	186
	List of publications	187
	Acknowledgements	189
