This project has been a truly European one – it started in Barcelona, led me first to Paris and then to Groningen. Along this journey, I had the good fortune to meet and work with inspiring and great people, who have guided me, gave me support and made this experience difficult to forget.

To my advisor in Paris, Laurent Toulemon: I am immensely grateful for your continuous support of my PhD research, your patience, motivation, and immense knowledge in all things demography. We have worked together for over three years at Ined and your guidance, support, and honest feedback helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my PhD study.

To my advisor in Groningen, Clara Mulder: I tremendously appreciate all your contributions of time and ideas for my research to make the PhD experience productive and stimulating. The enthusiasm and persistency you had for our research was contagious and motivational for me, even during tough times in the PhD pursuit. Thank you for encouraging my research and for always having the right words when I had to make important decisions – particularly in the final stages of finishing the PhD project.

J'adresse mes sincères remerciements à tous les collègues de Paris qui par leurs paroles, leurs écrits, leurs conseils, leurs critiques ont guidé mes réflexions et ont accepté à me rencontrer et répondre à mes questions durant mes recherches. Je remercie très spécialement Nancy, Marine, Alice, Pauline, John, Arlette, Cécile, Lidia, Elise, Olivier, Arnaud, Giancarlo et Giulia pour leur collaboration de près ou de loin à ce travailleur et pour leur sincère amitié et confiance. Vraiment un grand merci. Enfin, l'Ined pour son soutien logistique et financier.

A heartfelt thank you goes to my colleagues at the Demography Department who have given me the opportunity to learn from their work and have provided valuable comments to my PhD project. With a special mention to Matias, Elda, Nashrul, Nikhil, Arun, Allan, and Katharina. It was fantastic to have the opportunity to work, dine, and spent time with with you.

The European Doctoral School in Demography in Barcelona started my PhD experience. I dearly remember the EDSO-cohort 2011-2012 – thank you for the great time we had inside and outside the office.

A special thanks to my family. Liebe Mama, Papa, Christoph und Amelie – vielen Dank für eure immerwährende Unterstützung und Liebe. I would also like to thank all of my friends who have supported me along the way and incited me to strive towards my goal.

Thanks for all your encouragement!

Katrin
