# Content

Chapter 1	Introduction: Consequences of disease and treatment in ANCA-associated vasculitis	9
<b>Part I Consequences of ANCA-associated vasculitis</b>		
Chapter 2	Pregnancy in women diagnosed with antineutrophil cytoplasmic antibody-associated vasculitis: outcome for the mother and the child. <i>Arthritis Care Res 2012;64(4):539-45</i>	25
Chapter 3	Menopause and primary ovarian insufficiency in women treated for antineutrophil cytoplasmic antibody-associated vasculitis. <i>Arthritis Rheumatol. 2016;68(4):986-92</i>	39
Chapter 4	Androgen deficiency in male patients diagnosed with ANCA-associated vasculitis: a cause of fatigue and reduced health-related quality of life? <i>Arthritis Res Ther 2013;15(5):R117</i>	51
<b>Part II Individualized treatment for ANCA-associated vasculitis</b>		
Chapter 5	Viewpoint: Tapering of glucocorticoids in ANCA-associated vasculitis: one size does not fit all. <i>Submitted</i>	71
Chapter 6	Recovery of the hypothalamic-pituitary-adrenal axis during glucocorticoid tapering after the induction of remission in ANCA-associated vasculitis: rationale and design of the CURVE study	83
Chapter 7	Trimethoprim/sulfamethoxazole for the induction of remission in localised and early systemic granulomatosis with polyangiitis: a cohort study. <i>Submitted</i>	95
Chapter 8	Mycophenolate mofetil versus cyclophosphamide for the induction of remission in non-life-threatening relapses of antineutrophil cytoplasmic antibody-associated vasculitis: a randomized controlled trial. <i>Submitted</i>	113
Chapter 9	Summary, general discussion, clinical implications, future perspectives	131
Chapter 10	Nederlandse samenvatting	147
	Dankwoord	155
	About the author	163
