Red knot habits

An optimal foraging perspective on intertidal life
at Banc d'Arguin, Mauritania

Royal Netherlands Institute for Sea Research

The research presented in this thesis was conducted at the Department of Coastal Systems at the NIOZ Royal Netherlands Institute for Sea Research, 't Horntje (Texel), The Netherlands, according to the requirements of the Graduate School of Science (Faculty of Mathematics and Natural Sciences, University of Groningen).

This research was funded by NWO-VIDI grant awarded to Jan A. van Gils (grant number 864.09.002), and NWO-TOP grant ('Shorebirds in space', grant number 854.11.004) awarded to Theunis Piersma. Two additional expeditions were funded by the National Geographic Society (grant number GEFNE97-13). The printing was supported by NIOZ and the University of Groningen (RUG).

The preferred citation for this thesis is:

Red knot habits

An optimal foraging perspective on intertidal life
 at Banc d'Arguin, Mauritania

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 2 juni 2017 om 11:00 uur

door

Thomas Oudman

geboren op 7 december 1984
 te Groningen

Promotor

Prof. dr. T. Piersma

Copromotor

Dr. J.A. van Gils

Beoordelingscommissie

Prof. dr. J.M. Tinbergen

Prof. dr. A.M. de Roos

Prof. dr. M. Bateson
