**ABOUT THE
AUTHOR**

Marc Kirschbaum was born on the 24th of June 1987 in Tönisvorst, Germany. He graduated in 2006 from the episcopal Maria-Montessori School in Krefeld. During his last year in school he decided to move from Germany to the Netherlands. In the summer of 2006 he enrolled in the Biomedical school at the Radboud University of Nijmegen and obtained in 2009 the Bachelor degree and in 2011 the Master degree in Biomedical Sciences. In the last two years as Master student at the University of Nijmegen, Marc focused in his internships on different aspects of breast cancer metastasis and investigated new potential therapeutic options for patients with triple-negative breast cancer.

In early 2011, Marc joined as a PhD student the research group from Prof. dr. Ton Lisman and Prof. dr. Robert J. Porte at the University Medical Centre Groningen. In the upcoming 4 years, he focused on the investigation of platelet-mediated liver regeneration and the underlying molecular mechanisms.

Since 2015, Marc is Project Manager at PRA Health Sciences and responsible for the conduct of bioanalytical studies.
