Exploring the glycosylation potential of glucanases

From enzyme to product

Tim Devlamynck

Cover design: Marta Martínez García

Printed by: University Press

ISBN: 9789463570428

Tim Devlamynck was supported by a fellowship of the Ubbo Emmius Fund (University of Groningen) and the Special Research Fund (Ghent University).

Exploring the glucosylation potential of glucansucrases

From enzyme to product

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans

and

to obtain the degree of PhD at
 Ghent University
 on the authority of the
 Rector Prof. R. Van de Walle
 and in accordance with
 the decision by the Faculty Doctoral Commission

Double PhD degree

This thesis will be defended in public on

Friday 27 October 2017 at 14.30

by

Tim Nick Devlamynck

born on 12 January 1990
 in Torhout, Belgium

Supervisors

Prof. L. Dijkhuizen
Prof. W. Soetaert

Copromotor

Dr. E. M. te Poele

Assessment committee

Prof. R. M. Boom
Prof. G. J. W. Euverink
Prof. D. B. Janssen
Prof. J. Van Camp

Table of contents

Chapter 1	General introduction	7
Chapter 2	Glucansucrase Gtf180-ΔN of <i>Lactobacillus reuteri</i> 180: suppressing α-glucan synthesis results in improved glycosylation yields	49
Chapter 3	Improving the low operational stability of Gtf180-ΔN from <i>Lactobacillus reuteri</i> 180 by means of its immobilization	89
Chapter 4	Glucansucrase (mutant) enzymes from <i>Lactobacillus reuteri</i> 180 efficiently transglucosylate <i>Stevia</i> component rebaudioside A, resulting in a superior taste	107
Chapter 5	Glucosylation of stevioside by Gtf180-ΔN-Q1140E improves its taste profile	139
Chapter 6	Biocatalytic production of novel steviol glycosides with improved taste: scale-up, downstream processing and cost analysis	169
Chapter 7	Glucosylation of neohesperidin dihydrochalcone from citrus fruits: glucansucrase Gtf180-ΔN-Q1140E as biocatalyst for the glycodiversification of sweet glycosides	201
Chapter 8	Summary and future prospects	225
Samenvatting		233
