My first thank you is to all the enthusiastic participants of the studies for tolerating weird questions, loud noises and long days. Thank you!

Pieter, thank you for all the independence you afforded me within my PhD and all you taught me. Your example in matters of pragmatism, diplomacy and avoidance (of useless stuff of course) were enlightening and will certainly be put to good use in future.

Jan, thank you for sharing your incredible knowledge of the literature to constantly guide this research. Your approachability and weekly presence at the WIP meetings (along with the rest of the NeuroIMAGE group) made me feel part of the group despite the geographical distance.

Marcel, thanks for responding when it was *really* necessary 😊. Despite the general lack of willing e-mail contact you have been nothing but helpful with all the intricacies of data analysis. Thanks!

Dara and Colm thank you for your guidance and trust early on. Lisa (how have we still not met?) I cannot imagine having worked with a more positive person. Thank you!

A big thank you to the massive number of research assistants and interns who contributed to this research....I'm sorry that I'm not going to list you all but I hope you know who you are and how much your work was appreciated. Without the major efforts of everyone none of this would have been possible. Thank you!

Nicole, I'm so lucky to have had you working on this project. But more than that it was a pleasure to work, rant and rave with you about everything and anything all those long scanning days! We should do it more - without the scanning!

I'm not too sure where to start with the NeuroIMAGE/Compuls people... From weekly meetings, hundreds of scans and housing me! To car park based salsa, statue climbing and seaplane flying you've all been amazing! Thanks to the whole group for always making me feel welcome and particularly to my partners in crime (and airbnbs); Sophie, Jill, Marianne, Izablabla, Roselyne and Daan. Thank you too to the Donders TG and administration, the place would fall apart without you! And finally, Paul, thank you for all your help, patience and tolerance of ridiculous questions!

Accare colleagues, old and new, for all the fruitmomentjes, ijsmomentjes and just screw it momentjes thank you all! I had far more fun than I was supposed to at work with you guys. A particular thanks to my former office mates Anne-Flore, Simone, Halewijn and Thaïra (and Djûke! You may as well have been an office mate at times 😊), for your tolerance of my working 'style'. I'm gonna miss you all!

Lizanne ✨. I can't imagine a better friend or colleague. Bedankt voor alles!

TS-EU'ers, look what we did! It was a pleasure to have been part of all this with you amazing crazy people. Despite the pointless workshops our frequent adventures over the last few years have been an unforgettable experience.

Bulldogs (Nicolas Cage and co), for every early morning, every late night and every beer (except ACLO gala 2014) thank you! The dogs I've met, from near and far, are far too numerous to mention but you all contributed to making Groningen my home. Special thanks to Paranimf Esgo, Hendrik (you know), King Arthur and Carolin. You have been my family and more while here. Thank you for that.

Beste paal familie, you are all astounding! Every bruise was entirely worth it and I miss you so much already. Sabrina ♥ your enthusiasm and motivation for everything you do are infectious! I can only dream of finding another teacher like you!

Anne-Marie (zoeteke!!) what the hell would I have done here without you?! You're the best!

And finally thank you to my tremendous international family and friends for all the support, encouragement, care packages and visits. I'm delighted that I'm not the first PhD in the family (proud of you mother) and the way you overachieving college scholars are going maybe I won't be the last (don't do it!!). I hope you don't mind me making the flight a little longer from now on!
