Post-transcriptional Control of C/EBP α and C/EBP β Proteins. Insights into their role in energy homeostasis and diseases

M.A. Zaini

The research described in this thesis was mostly conducted at the European Research Institute for the Biology of Ageing, University Medical Center Groningen, University of Groningen, The Netherlands. And also at Leibniz Institute for Age Research - Fritz Lipmann Institute (FLI), Jena, Germany.

The printing of this thesis was financially supported by the University of Groningen and the Graduate School for Drug Exploration (GUIDE).
