A

Acknowledgments

First of all I would like to express my great gratitude to ALLAH Almighty Who gave me the courage, health and energy for everything I did right during my studies and all over my life.

Then I want to thank all the great people who have helped, supported and inspired me during my PhD.

My main supervisor **Cor Calkhoven**: from the deep of my heart I thank you Cor. I don't think that any words can describe my gratitude to you. Everything started by your support. I don't forget our first meeting in FLI and your enthusiasm nominating me for the floater PhD scholarship. Thanks a lot for your trust, patience, help and guidance before, during and after my PhD in your lab. You are a great scientist and I learned a lot from you. It was very hard decision to move from Jena to Groningen, but at the end my priority was to stay with the same research team. It was very good decision and I never regret it. Thanks for your constant support and encouragement both in work and private life.

My co-supervisor **Christine Müller**: thanks for your endless help and support. You are a great organized supervisor who is full of knowledge and brilliant ideas. You were always available to help and ready to provide time for discussion and give solutions. Thanks for never turning me down when I asked for help and guidance. I hope one day I will be organized like you, I don't forget how you searched your old lab books to get small details of a 15 years old experiment!!!

I am thankful to the PhD thesis reading committee, **Prof. Gerald de Haan**, **Prof. Torsten Heinzl** and **Prof. Jan Tuckermann**. I hope that you enjoyed reading this book and thank you for the critical evaluation and discussion.

Gerald de Haan: In addition to being in my reading committee I want to thank you for your interest in my projects and for being in my PhD evaluation committee in Groningen. Your ideas and suggestions after my seminars were very valuable. I also appreciate your advices about the possibilities of my scientific career development in different places in The Netherlands.

From the European screening port in Hamburg I have a huge thanks to **Ole pless**: I have to say that knowing you and getting your help to run the drug screening was the

most important point during my PhD. With our collaboration I felt that I got a boost of energy and enthusiasm to go on. Thanks for your belief in C/EBP story and for being generous and supportive all the time. I am very happy that we became friends in a very short time and it is amazing that we share the same date of the PhD defense but with ten years later ☺. I also want to thank **Jeanette Reinshagen** for the support and guidance during the time I spent in Hamburg and also for introducing me to work on Echo®555 robot. My screening project would never be in its shape now without your help Jeanette and Ole, Thank you.

Next to my PhD projects I had an opportunity to work on protein aggregation using *C.elegans* as a studying model and for that I am very grateful to **Ellen Nollen**: Thanks a lot Ellen for introducing me to the interesting *C.elegans* field and giving me the opportunity to participate in Lir3 project and also for your constant positive and supportive attitude. You are not only an outstanding scientist but also a nice person full of kindness and humanity. I highly appreciate your efforts trying to help all other people. I am also thankful to **Olga Sin**: I have to say very good job Olga. I was knowing that you are doing very good job and during your last visit to Groningen I found that it is even excellent job. Thank you for all the nice times we spent discussing different interesting topics and exchanging ideas about future plans. I am very happy that I could participate and help in your nice story. Thank you for your passion to learn Arabic words and I wish all the best in your post-doc.

For the bioinformatic analysis I would like to thank **Victor Guryev** for all of the support and collaboration. I am very happy that I worked with you. Your input on the RNA-seq analysis was very valuable and had a strong impact on my project. I am also thankful to **Tristan de Jong** for being always available to help and being patient for my several data analysis requests. Thank you for being always full of energy and for providing the beautiful heat maps, plots and gene lists.

From the chemical and pharmaceutical department in Groningen University I would like to thank **Frank Dekker** for being in my PhD evaluation committee in Groningen. The way how you remember the complicated chemical structures of the compounds and draw them on paper is very inspiring Frank. It was great experience to try your newly invented chemical reaction to detect protein acetylation and apply it for endogenous C/EBP α .

From the CMB/Jena I would like to thank **Oliver Krämer:** for being in my PhD evaluation committee in Jena. Your collaboration, help and input at that time were very essential in developing my acetylation project. I am also thankful to **Martin Wieczorek** for all the discussion we had about protein acetylation and also for sharing a lot of materials and expression plasmids.

From the section of Oncogenetics at CCA-VUmc in Amsterdam I want to thank my future post-doc supervisors **Rob Wolthuis** and **Josephine Dorsman** for their interest in my projects and also for offering the opportunity to have my post-doc training in their lab. Thanks a lot for your trust, support, care, nice attitude and flexibility in work which was of great help in the last period of my PhD. I am very much looking forward to starting at VUmc and wish us success in our research ☺.

I also would like to express my gratitude to some people I worked with in Karolinska institute in Stockholm and they helped me to step further to the PhD.

Kerstin Sollerbrant: Thank you for being my main supervisor in KI. In your lab I learned too many things which helped me a lot during my PhD. Thank you for investing your time and energy in me, and for always being available even after I left to Jena.

Taranum Sultana: My daily lab supervisor in KI and also my good friend and advisor. Thank you Taranum for trusting me and for being patient to teach me all the basics of the molecular biology. You are really a talented teacher who is full of energy and enthusiasm. I will never forget your tips in gavaging the mice and your assignments to let me read more and more ☺.

Ahmed Reda: My best colleague during my master study in Skövde and Stockholm as well. Thank you Ahmed for all the nice times we spent together and for all the discussions and informative conversations we had. You are a loyal person who I am very proud to be his friend. Wish you all the best for your postdoc.

I am very grateful to all of my current colleagues in the Calkhoven lab:

Tobias Ackermann: My PhD road companion and friend. We both started at the same time and decided to move to Groningen as well. Thank you Tobi for all the time we spent together on the bench or in the office. You are a very nice person full of knowledge and unique respectful opinions. I always enjoyed our conversations and discussions about first science and then social life, politics, sports, traditions, religion, Brexit and European union laws, elections, middle east issues, future plans and never ending list of topics☺. You are a smart hardworking and sharp minded researcher and I am sure that you are going to be a very successful scientist. I wish you all the best in your research and future life.

Gertrud Kortman: I can't imagine how the life in the lab would be without your help and organization. You are an organized, highly efficient and dedicated VIP in the lab. I have to say that I was very lucky to have you in the team. You were always there to help with every kind of experiments and it is amazing how everything work in your hands. I am very thankful to you Gertrud for the RNA-seq libraries, hundreds of qPCRs, assistance in mice injection, western blotting, washing the membrane in the early morning before I reach the lab and many other things that can't be done without you. Thank you also for dealing with all the Dutch forms and translating many documents for me and even helping to stamp documents from Den Haag. I wish you all the best with your house renovation and future life.

The Young Calkhoven group members **Britt Sterken** and **Hidde Zuidhof:** It is wonderful to see highly talented young PhD students in the lab full of eagerness, commitment and pleasantry. Thank you Britt for translating my Dutch summary and sorry for all the football discussions I had with Tobi and Hidde which you didn't like. Thank you Hidde for all the nice time we shared in the last few months. I wish you both all the best in your PhD theses and I am looking forward to your discoveries about the role of LIP in breast cancer.

Also I would like to thank the previous colleagues in Calkhoven lab in both Jena and Groningen:

Kyungmin In: you were the first one welcoming me when I decided to join the lab in Jena and I still remember you saying welcome onboard. It was my pleasure to collaborate with you in your SBDS project. Thanks a lot for the nice time we had in

Jena and for sharing the interesting information about the situation at the boarder of the two Koreas.

Götz Hartleben: The brilliant postdoc of the Calkhoven group. Your passion toward mTORC function is inspiring. Thank you for all the scientific discussions and for the friendly chats on non-research topics. I wish you a very successful research in Munich.

Sabrina Eichwald, Verena Gräfe and Laura Zidek: Thank you for being nice colleagues.

From the ERIBA ground floor I would like to thank **Marco Demaria:** You are a smart successful young group leader with bright future. Thanks for sharing your experience about the work in USA and giving advices on future post-doc options. In addition I am really thankful to all the members of Nollen group: **Renee, Wytse, Anita, Mandy, Leen, Lisette, Freek, Ale, Esther, Celine and Michele,** and Demaria group: **Simone, Thijmen, Boshi, Ale, Jamil, Abel and Jas,** for the friendly environment they made and I wish you all the very best in your coming experiments.

I would like to show my gratitude to **Sylvia, Annet, Nina, Craig, Klaas, Henk, Helena, Catarina** and **Yinfai** from ERIBA management team. Thanks a lot for your help during my PhD.

From the Leibniz institute in Jena I would like to express special thanks to **Claudia Müller:** Thank you Claudia for everything you have done for me and for all of the PhD students in FLI. You are an excellent coordinator making the life for every international PhD student in FLI much easier to have good start. Thank you for your help and tips about living in Jena and your help even my moving to Groningen.

I would like thank many friends and nice people I have met in Jena:

Mohammad Alzrigat: In my first day in Jena you were the first person I met and from then we became a close friends. Thank you Mohamad for your nice sense of humor and also for the crazy tips for my admission interview at that day. I will never forget our nice times together in the guest house at Am Herrenberge watching real

Madrid matches and cooking sujog ☺. Wish you and your family all the best in Sweden HAJJI.

Taha Genco and **Ahmad Sagheer**: Thank you Taha and Ahmad for all the nice time we enjoyed together starting from football, cooking, singing, dancing and especially singing and jumping in the elevator ☺. I am also thankful to **Samer Haftar** for being such an amazing person. Thank you all guys also for being family friends and wish you and your families all the best.

Mubashir Ahmed: You are an inspiring person Mubashir. Thanks for all the pure deep discussions we had about different aspects of the life which made me feel full of tranquility afterwards. Everybody know you also know that you are going to be extraordinary scientist. Wish you all the best in your academic career and future life.

Besides the nice people I had in Jena, I had an astonishing group of friends who mainly I met in Halle including **Kareem, Jameel, Mahmoud, Bashar, Kamal, Yaseen, Jaber, Amer** and **Khaled**. You were guys an amazing combination of everything. I was always looking for the weekend that I am going to visit you and would like to thank you for being good friends and for your patience about all the crazy things I might have done or said.

Before I move to live in any new city I always pray ALLAH Almighty to let me meet the closest person to him and make us good friends sharing good paths. I believe that for Jena this person was **Houssam Zakkour** and for Stockholm he was **Fawad Mian**: Although you don't know each other but you amazingly share many great characteristics. You were not only my best friends but also you were close as brothers. From the deep of my heart I thank you for your friendship, brotherhood, help, care, advices, support, honesty and for all other good things you do. I have learned a lot from you and I am very grateful that I shared something with you.

Finally I want to thank my family, who without their love, motivation and support I wouldn't have finished my thesis:

My adored and best parents, **Irfan** and **Faihaa**: I haven't done anything to deserve parents as awesome as you. You are who made me what I am today. Thank you for

your unconditional love and support throughout my life. Thanks for always believing in me and cheering me on. Thanks for constantly reminding me of what truly matters in life. Whatever I do will never pay back anything of what you did for me. Because of you, I took on the (C22, V38) of the Holy Quran as main principle in life. You are always in my prayers and will stay forever. I love you!

My brothers and sisters **Nisreen, Dania, Emad, Mohamad, Laila and Samer:** You and your families are nothing than pure happiness. I may not always say it; but my heart is always overflowing with gratitude for you. This time I feel that I want to shout very loudly saying that I have the best brothers and sisters of all. Thank you for everything.

It would have been impossible for me to be where I am today, without the support of my beloved and wonderful wife and closest friend **Hala:** The words are inadequate to describe my gratitude to you but I will say one sentence: You are the joy of my heart and I love you to the moon and back!

My little daughter **Leen:** Even in the winter Dutch weather, seeing you laughing filled my day with sunshine. Since you were born, and in everything I have done, I have always aimed to do my best, make you proud and inspire you. I hope this thesis can go some way to inspiring you to work hard and believe you can always achieve what you put your mind to.

Thank you all,

Groningen, 29-10-2017
