Acknowledgements

“Life is like a train ride.” My train to the PhD study has reached its destination. Thanks to all the people I met on board who decorated my trip with joy and inspiration.

First, I would like to express the gratitude to my promotor Nicolai Petkov. Thank you so much for providing me the opportunity to start my PhD in the Intelligent System group. You guide me in my PhD career with your meticulous attitudes on scientific research and the concept of concision and easy comprehension. During the period of writing up my thesis, you gave me a small drawing made by the dutch artist Bruna, who created the ‘Nijntje’ that is notable for its simple graphic shapes. You wrote on the top of the drawing two words ‘Write simple’. I am also grateful for the chances of participation in many conferences, international workshops, bike tours and culinary events.

I am thankful to my co-promotor George Azzopardi for your great guidance and friendship. Thank you so much for the discussion on nice ideas and sharing experiences at work or in life. You are always patient to hear in details the problems I encountered and give your biggest support to help out of it. I am grateful for having been under your supervision and looking forward to future collaborations.

I also would like to thank Prof. Nomdo M. Jansonius for the collaboration on the glaucoma project. It was a great pleasure for me to work with you. Thank you for your explanation and immense support from the aspects of epidemiology and pathology in ophthalmology. Your gold standard annotation of the glaucoma features is the fundamental work for the research project.

I am grateful to the members of the assessment committee, professors Xiaoyi Jiang, Danilo P. Mandic and Alex C. Telea for your reviews of my thesis.

I want to specially thank my paranymphs, Estefania and Laura, for your great support on the day of my defense. Muchas gracias, guapas! Thank you so much for agreeing to be the most brave people by my beside and also for your passionate friendship.

I feel fortunate for having an academic environment surrounded by great scientists and teachers, Michael Wilkinson, Michael Biel, Kerstin Bunte, Doina Bucur, Paris Avgeriou, Marco Aiello and many more.

A special thanks to my colleagues and friends with whom I share the pain and happiness during the PhD studies in Groningen: George & Char for the nice visit in Malta during the CAIP conference, Michael & Meiny for many BBQs at your lovely garden, Tizi & Ugo for the summer school and swimming course, Nico & Ariana for the invite to Angri during the Christmas (my first Christmas in an European family), Laura & Luis for the invite to Leon during the Reyes, Daniel & Renata for the amazing picanha and caipirinha, Manuel & Kitty for the nice dutch farm trip, Estefi & Maik for the Spanish-Chinese Huis in Majorca, Barcelona and of course Gro!, Laura for girls' movie nights, Andreas, Ahmed, Sreejita, Li, Xiaoxuan, Arya, Godliver, Friedrich, Chen, Xiao, Ang, George, Sofia, Sarah, Zengyang, Chengtao, Eirini, Dario, Walter, Simone and many more.

I also would like to thank Maik for helping me with the translation of the summary to the dutch *samenvatting*.

I am grateful to the administrative staff for simplifying my life at the University. Thanks to Janieta de Jong-Schlukebir, Esmee Elshof (also as a nice neighbor), Desiree Hansen, Ineke Schelhaas, Helga Steenhuis, Lony Emmen, Ingrid Veltman, Barbara Visser.

I am also thankful to my Chinese friends who could understand all the difficulties in stay at a foreign country and could support each other in all ways. Thanks Jinfeng, Sheng & Afang and Yiming for the great friendship and the romantic road trip to Germany. A special thanks to Sheng for all the discussions and inspirations on the research topics. Thanks to Xiaolin for the girls' chat, Juan Shan & Lei Liang, Wenjun & Tao Zhang, Bo Zhang & Xiaoqi and many others.

My special thanks also goes to Ting for the visits to Netherlands during your PhD study in Sweden and also to Weichuan for many discussions on the scientific topics.

Gratitude also goes to Prof. Oudkerk, Prof. Vliegthart and Dr. Peter M.A. van Ooijen who offered me the position as a postdoc researcher at CMI (Center for Medical Imaging) in UMCG and allow me to start the job before defending my PhD thesis. A special thanks to Peter for trusting me to participate in different "cool" projects based on various disciplines. My new academic life is also shared with a group of people with diverse expertise at CMI. Many thanks is also due to Stella, Lingyun, Congying, Yeshu, Daan, Herbert, Ricardo, Pangji, Mienieke, Wout, Marleen, Randy, Merel, Gert-Jan, Daiwei, Daan Ties, Sunyi, Bingjiang and Runlei.

A great thanks to my parents, parents in law and the big families behind. Most of them couldn't really understand my decision of going to a foreign country for a

PhD degree but you always support me with your love.

And most importantly, you, Astone! Our PhD crossed completely from the beginning at the Intelligent System group but then diverged completely. Thank you for your understanding and support on all my decisions. Your accompany made my life in cold Groningen warm and bright.
