**Neuromuscular control of
Lokomat guided gait**
evaluation of training parameters

Klaske van Kammen

The studies in this thesis are the result of a collaboration between Revalidatie Friesland and the Center for Human Movement Sciences, part of the University Medical Center Groningen, University of Groningen.

This thesis was financially supported by:

Revalidatie Friesland, Centrum voor Bewegingswetenschappen (Universitair Medisch, Centrum Groningen, Rijksuniversiteit Groningen), Dr. C.J. Vaillant Fonds, Stichting Woudsend, Anno 1816, Stichting Wieger Jansleen, Meindersma-Sybenga Stichting, Stichting Moeder Wiersma Leen, Stichting JONG, Fonds Nuts Ohra, Fonds De Gavere, Stichting het Diaconessenhuis, Revalidatiefonds, Cornelia-Stichting, Graduate School of Medical Sciences Groningen, Groninger Universiteitsfonds.

Ph.D. training was facilitated by the research institute School of Health Research (SHARE), part of the Graduate School of Medical Sciences Groningen.

The printing of this thesis was financially supported by:

University of Groningen, University Medical Center Groningen, Stichting Beatrixoord Noord-Nederland, Research institute SHARE.

evaluation of training parameters

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. E. Sterken
en volgens besluit van het College voor Promoties.
De openbare verdediging zal plaatsvinden op
woensdag 14 maart 2018 om 12.45 uur

door

Klaske van Kammen

geboren op 16 maart 1991
te Groningen

Promotor:

Prof. dr. L.H.V. van der Woude

Co-promotors:

Dr. A.R. den Otter

Dr. A.M. Boonstra

Dr. H.A. Reinders-Messelink

Beoordelingscommissie:

Prof. dr. E. Otten

Prof. dr. J.S. Rietman

Prof. dr. T.W.J. Janssen

Contents

<i>Chapter 1</i> General introduction and outline	<i>page 7 – 17</i>
<i>Chapter 2</i> The combined effects of body weight support and gait speed on gait related muscle activity: a comparison between walking in the Lokomat exoskeleton and regular treadmill walking	<i>page 19 – 45</i>
<i>Chapter 3</i> The combined effects of guidance force, bodyweight support and gait speed on muscle activity during able-bodied walking in the Lokomat	<i>page 47 – 67</i>
<i>Chapter 4</i> Differences in muscle activity and temporal step parameters between Lokomat guided walking and treadmill walking in post-stroke hemiparetic patients and healthy walkers	<i>page 69 – 95</i>
<i>Chapter 5</i> Lokomat guided gait in hemiparetic stroke patients: the effects of training parameters on muscle activity and temporal symmetry	<i>page 97 – 119</i>
<i>Chapter 6</i> Summary and General discussion	<i>page 121 – 135</i>
<i>Appendices</i>	<i>page 137 – 151</i>
