Emergent properties of bio-physical self-organization in streams

Loreta Cornacchia

Loreta Cornacchia, 2018. Emergent properties of bio-physical self-organization in streams. PhD thesis, University of Groningen, The Netherlands.

Copyright© 2018 by Loreta Cornacchia. All rights reserved. No part of this work may be reproduced by print, photocopy or any other means without the permission in writing from the author.

The research presented in this thesis was carried out at the Department of Estuarine and Delta System of the Royal Netherlands Institute for Sea Research (NIOZ-Yerseke), and the Conservation Ecology Group, part of the Groningen Institute for Evolutionary Life Sciences (GELIFES), of the University of Groningen (The Netherlands). This research was supported by the European Union's Seventh Framework Programme FP7-PEOPLE-2012-ITN under grant agreement N. 316546. Printing of this thesis was financially supported by NIOZ and University of Groningen.

Emergent properties of bio-physical self-organization in streams

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 23 februari 2018 om 12.45 uur

door

Loreta Cornacchia

geboren op 22 maart 1988
 te Bari, Italië

Promotores

Prof. T.J. Bouma

Prof. J. van de Koppel

Prof. D. van der Wal

Beoordelingscommissie

Prof. K.R. Timmermans

Prof. M.G. Rietkerk

Prof. M.G. Kleinhans

Table of Contents

Chapter 1	
General introduction	1
Chapter 2	
Plants regulate river flows and water levels through self-organization	15
Chapter 3	
Landscapes of facilitation: how self-organized patchiness of aquatic macrophytes promotes diversity in streams	41
Chapter 4	
Flow-divergence feedbacks underlie propagule retention by in-stream vegetation: the importance of spatial patterns for facilitation	75
Chapter 5	
Plants face the flow in V-formation: a study of plant patch alignment in streams	101
Chapter 6	
Turbulence-mediated facilitation of resource uptake in patchy stream macrophytes	125
Chapter 7	
General discussion	147
References	159
Summary	181
Samenvatting	185
Acknowledgements	189
Curriculum vitae	195
