TABLE OF CONTENTS

Chapter 1	General introduction and outline	7
Part 1	The neurotoxic effects of exposure to environmental chemicals during childhood: an overview	
Chapter 2	Developmental neurotoxicity of persistent organic pollutants: an update on childhood outcome <i>Archives of Toxicology</i> 2015, 89(5), 687-709	17
Part 2	Exposure to environmental chemicals and neurological functioning from birth up to and including adolescence	
Chapter 3	Prenatal exposure to polychlorinated biphenyls and their hydroxylated metabolites is associated with motor development of three-month-old infants <i>Neurotoxicology</i> 2013, 38, 124-130	55
Chapter 4	Prenatal exposure to polychlorinated biphenyls and their hydroxylated metabolites is associated with neurological functioning in 3-month-old infants <i>Toxicological Sciences</i> 2014, 142(2), 455-462	73
Chapter 5	The effects of prenatal exposure to organohalogen compounds on infant's mental and motor development at 18 and 30 months of age <i>Submitted</i>	91
Chapter 6	The effects of prenatal exposure to persistent organic pollutants on neurological development during adolescence <i>Submitted</i>	113
Part 3	Endocrine disrupting effects of environmental chemicals	
Chapter 7	Polychlorinated biphenyl exposure and deiodinase activity in young infants <i>Science of The Total Environment</i> 2017, 574, 1117-1124	135
Chapter 8	The effects of prenatal exposure to persistent organic pollutants on pubertal development <i>Submitted</i>	157
Chapter 9	General discussion and future perspectives	175
Chapter 10	Summary	197
	Nederlandse samenvatting	203
	Dankwoord	209
	About the author	213
	Abbreviations	215
