## **Chapter 8**

### **Acknowledgements**

My PhD has been a great adventure full of discoveries, and enjoyable moments as well as setbacks and frustrating experiments. This adventure would not have been possible without the support and encouragement of everyone around me, who helped me on the scientific work and in my personal life. I would like to take this opportunity to thank my colleagues, friends and family who have supported me during these years.

First of all, I would like to thank **Giovanni** for giving me the opportunity to start my PhD in his research group. Your supervision, your enthusiasm, as well as your unlimited interest in my projects and experiments were extremely helpful throughout these years. Thank you for encouraging me to explore and to learn, especially during the first years of my PhD. You were always there for a chat, a scientific discussion or to provide new ideas for our projects.

I would like to thank the members of the reading committee; Prof. **Driessen**, Prof. **Witte** and Prof. **Oukhaled** for your time devoted to reading my thesis and for your feedback.

**Florian** and **Lisa**, together we started our PhD in the Maglia lab. Thank you for all the support, drinks and parties that made these years a lot more fun!

**Anmara**, bedankt voor alle hulp tijdens deze jaren met het regelen van allerlei zaken. Het was zo fijn dat we altijd bij jou terecht konden met onze vragen. **Jannet**, bedankt voor je ondersteuning tijdens het afronden van mijn PhD en het regelen van mijn defence.

**Nicole** and **Nieck**, thanks for being my paranymphs on this important day.

I would like to thank all the members of the Chemical Biology I group. **Nicole**, we have shared an office for as long as I can remember. Thank you for all the help, and the random conversations that made our days more fun. **Nieck** and **Adina**, thank you for the fun times we had in our office on the 8<sup>th</sup> floor. **Shengli**, thank you for teaching me the skills of molecular biology and electrophys when I just started my PhD, I wish you all the best in your scientific career. **Florian**, together we worked on the peptide spectrometry project, thank you for the good times in the lab and the interesting discoveries. I have no doubt you will do great work in Leuven. I would like to thank the other members, **Carsten**, **Huang**, **Natalie**, **Sarah**, **Maaruthy**, **Matthijs**, **Stefania**, **Sabine**, **Edo**, **Xiangling**, **Kasia**, **Yulia**, **Tycho**. You were more than helpful in the lab and we had lots of fun during our coffee breaks, when going out for drinks on Thursday afternoons and during the amazing Secret Santa and BBQ activities.

This thesis would not have been possible without the help of numerous students. **Sabine** and **Gemma**, a special thanks to you for your great work on the engineering of  $\beta$ -barrel nanopores. I am very happy to see that both of you are also pursuing a PhD now. I would also like to thank **Lyan**, **Ewen**, **Pierluca**, **Reinder**, **Martijn** and **Delia** for their contributions to various projects.

Verder wil ik graag mijn vrienden en familie bedanken die er voor mij geweest zijn in de afgelopen jaren. Vrienden van **LST** en mijn jaarclub **Perspectief**, dankzij jullie waren mijn weekenden vaak gevuld met leuke activiteiten, verjaardagen en borrels.

Lieve **papa, mama, Annelotte** en **Bas**: bedankt voor alle steun, zorgen en aandacht in de afgelopen jaren. Dankjewel **Romy**, dat je er voor me was in de afgelopen jaren en me hebt aangemoedigd met je eindeloze enthousiasme wanneer ik dat nodig had. Dankzij jullie steun heb ik dit allemaal kunnen doen.
