**Microbial synthesis and degradation
of polyhydroxyalkanoates (PHAs)**

Wen Zhou

The work described in this thesis was performed in the group of Products and Processes for Biotechnology of the Engineering and Technology Institute Groningen (ENTEG) at the University of Groningen. This research was funded by the China Scholarship Council (CSC) and the University of Groningen (RUG).

Microbial synthesis and degradation of polyhydroxyalkanoates (PHAs)

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on
 Monday 20 February 2023 at 14:30 hours

by

Wen Zhou

born on 5 Feb 1994
 in Hunan, China

Supervisors

Prof. G.J.W. Euverink

Prof. F. Picchioni

Co-supervisor

Dr. J. Krooneman

Assessment committee

Prof. A.J.M. Driessen

Prof. H.J. Heeres

Prof. G. Eggink

DEDICATED TO

My family, who supported and believed in me forever

My teachers, who guided and cared for me

My friends, who helped me and inspired me

Contents

Chapter 1

General introduction 1

Chapter 2

Polyhydroxyalkanoates (PHAs) synthesis and degradation by microbes and applications toward a circular economy 19

Chapter 3

Thauera aminoaromatica MZIT identified as a polyhydroxyalkanoate-producing bacterium within a mixed microbial consortium..... 69

Chapter 4

The impact of carbon to nitrogen ratios and pH on the microbial prevalence and polyhydroxybutyrate production levels using a mixed microbial starter culture 95

Chapter 5

Insight into polyhydroxyalkanoate (PHA) production from xylose and extracellular PHA degradation by a thermophilic Schlegelella thermodepolymerans 128

Chapter 6

Polyhydroxyalkanoate (PHA) production from xylan and hemicellulosic biomass biorefinery by Schlegelella thermodepolymerans 157

Chapter 7

Summary 181

Chapter 8

Future perspectives..... 195
