# Acknowledgements

After a long journey on a, sometimes, quite bumpy road, I managed to arrive to the point to conclude with these words. I want to thank my promoters dr. M. H. F. (Michael) Wilkinson, prof. dr. R. P. (Ronald) Stolk, and prof. dr. Nicolai Petkov who have supported me during this project. You gave me the freedom to explore and grow as a researcher. Ronald, thank you for your feedback and especially for the discussions we had. I really appreciate your to-the-point and pragmatic approach.

I want to thank the reading committee prof. dr. J. B. T. M. (Jos) Roerdink, prof. dr. N. Passat and prof. dr. H. Talbot for spending their valuable time to read my thesis. Thanks also for their comments, suggestions and advise in order to improve this work.

This work would not have been possible without the guidance and patience of my supervisor dr. M. H. F. Wilkinson (Michael). You taught me, always patiently, the various facets of the art of being a researcher. You always tried to interpret difficulties and inconveniences as something positive from which I could learn and use to my benefit. You always believed in this work and its outcome even at the moments I was giving up or had almost done so. It was always a great pleasure working with you and I really enjoyed our discussions, with or without whisky. You were not only a supervisor but also a great friend. Michael, my dear friend, I could not wish for a better guide and companion during this adventure. Thank you very much indeed!

I want to thank Marijke Verheij for her support, advise and being a great colleague. Thank you for helping me to become focused and guarding me from the pitfalls, specially when it comes to time management. I want to thank my colleagues and friends at CIT, specially from DS, RDMS, HPC, LWP teams for their support and making my life a pleasant one at CIT. Besides work related discussions, I enjoyed our coffee-break talks and afternoon walks, where I learned both about survival challenges without losing souls and about vampires. I was pleasantly surprised that there are many Amiga fans in our team. I want to thank super Bob for being a nice and patient office mate and for our interesting discussions, topics not disclosed. The CIT-DR had its own share of contribution

## ACKNOWLEDGEMENTS

---

to my life at CIT. I want to thank my DR colleagues.

I want to thank colleagues from BI, specially, Mohammad, Jannis, Sreejita, Frederieke, Hyoyin, Roland, Michael B. and Kerstin. I really enjoyed our discussions on various interesting topics. Elisa, thank you for being so patient and a great office mate. You got me drinking coffee during the day again with a good share of sports, including walking five stories up and down: unfortunately, we stopped the exercise part.

I want to thank my paranympths Hopko, Elisa and Heiko. You made my life much easier. Thank you for your help and support.

I want to thank my dear friends specially Heiko, Boukje, Bart and Carin for supporting me and being great friends. You were there for me when I needed you. I have always enjoyed your presence and felt happy seeing you. Now, I will have more opportunity to regularly spend time together with you to enjoy life, flying small airplanes, making long-distance hikes and having drinks of beer. Carin, I promise we (me and Bart) will not go that far and be that late again. I want to thank my friends and my colleagues from Trefshot and LichtZone specially Frank, Dick, Mo, Jan K. and Henny for the great times we have spent and hopefully will spend discussing photographs, techniques and other, sometimes, more personal matters.

I want to thank my dear family for their unconditional support. During this period you sacrificed the most; you accepted my absence even when I was physically present. I could, unfortunately, not spend enough time with you and give you the attention that you deserved and that I wanted to give. Sylvia (moeders), you always believed in me and were a fantastic guide and friend: you gave me comfort when needed and you were always there for me, thank you very much indeed! Sharon, I am glad that we met; thank you for being so patient with me and for your unconditional support! My dear mother and Farideh, Zahra, Homa, Reza, Mohammad, Ali, Farzaneh, Reza K., Sip and Andy, thank you for your unconditional support and the great times we had together. Sadly, I lost some of you during this journey. I felt always welcome with you and hope to see you more often. To my great nephews and nieces, thank you for the great times we spent together; regretfully, I have missed important moments of your lives. I hope to see you more frequently, listen to your stories and enjoy your presence.
