Neurodevelopment, brain vasculature and schizophrenia

Sofía Puvogel

The research presented in this thesis was conducted at the Department of Biomedical Sciences of Cells and Systems, sections Molecular Neurobiology and Cognitive Neuroscience, University of Groningen, University Medical Center Groningen, the Netherlands, and at the Department of Biology, Faculty of Sciences, Universidad de Chile, Santiago, Chile.

The work presented in this thesis was financially supported by Agencia Nacional de Investigación y Desarrollo (ANID), University Medical Center Groningen, Research School of Behavioural and Cognitive Neurosciences, Stanley Medical Research Institute, and the Cock-Hadders Foundation.

Cover design and hand drawings María Jesús Valenzuela.

UNIVERSIDAD DE CHILE

Neurodevelopment, brain vasculature and schizophrenia

PhD thesis

To obtain the degree of PhD of the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans

and

to obtain the degree of PhD of the
Universidad de Chile
on the authority of the
Rector Magnificus Prof. Rosa Devés
and in the accordance with
the decision by the Dean of the Faculty of Sciences.

Double PhD degree

This thesis will be defended in public on

Monday 6 March 2023 at 12:45 hours

by

Sofía Puvogel

born on 6 November 1992,
in Santiago, Chile

Supervisors

Prof. I.E.C. Sommer

Prof. B.J.L. Eggen

Prof. V.A. Palma Alvarado

Assessment Committee

Prof. J.C. Letelier

Prof. E.S. Utreras

Prof. D.S. Verbeek

Prof. S.A. Kushner

Chilean Cosupervisor

Prof. M. Sanhueza

Chilean Thesis Committee

Prof. J.C. Letelier

Prof. E.S. Utreras

Prof. A. Núñez-Parra

Prof. F. Aboitiz

Contents

Chapter 1 General introduction and outline of the thesis	11
Chapter 2 Single-nucleus RNA sequencing of the adult human subependymal zone reveals a decline in the relative abundance of oligo progenitors and transcriptional changes in different cell types associated with age	29
Chapter 3 Altered resting-state functional connectivity in hiPSCs-derived neuronal networks from schizophrenia patients	71
Chapter 4 Brain vasculature disturbance in schizophrenia	121
Chapter 5 Single-nucleus RNA sequencing of midbrain blood-brain barrier cells in schizophrenia reveals subtle transcriptional changes with overall preservation of cellular proportions and phenotypes	149
Chapter 6 Summary, general discussion and future prospects	191
Chapter 7 Appendices	203
