Computational Design and Screening of Enzyme Enantioselectivity

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Tuesday 18 April 2023 at 11.00 hours

by

Elvira Bombino

born on 22 December 1992
 in Bari, Italy

Supervisors

Prof. D.B. Janssen
Prof. M.W. Fraaije

Co-supervisor

Dr. A.M.W.H. Thunnissen

Assessment Committee

Prof. B. Poolman
Prof. S.J. Marrink
Prof. L. Gardossi

A mia madre, a mio padre,
e alle mie sorelle.

*“Tra la partenza e il traguardo nel mezzo c'è tutto il resto.
E tutto il resto è giorno dopo giorno.
E giorno dopo giorno è silenziosamente costruire.
E costruire è sapere, è potere rinunciare alla perfezione.”*

*“Between the start and the finish line, there is everything else.
And everything else happens day after day.
Day after day it is silently building.
And to build means being able to give up perfection.”*

Contents

Chapter 1	
Computational strategies in molecular enzyme engineering	9
Chapter 2	
Computational design of enantiocomplementary epoxide hydrolases for asymmetric synthesis of aliphatic and aromatic diols	45
Chapter 3	
MD and QM modeling of regioselective cis-stilbene oxide hydrolysis by epoxide hydrolase variants	73
Chapter 4	
Computation-Aided Engineering of Cytochrome P450 for the Production of Pravastatin	107
Chapter 5	
Regio- and stereoselective steroid hydroxylation by CYP109A2 from <i>Bacillus megaterium</i> explored with X-ray crystallography and computational modeling	157
Chapter 6	
Summary and future perspectives	187
Appendices	203
Samenvatting	205
Curriculum Vitae	218
Acknowledgments	219
