Contents

1. Introduction: Planning for flood resilient cities	8
1.1 Growing cities, growing flood risks	9
1.2 A paradigm shift in flood risk management	11
1.3 Introducing resilience to the field of flood risk management	14
1.4 Towards flood resilience? A strategy-making and implementation challenge	17
1.5 A qualitative case study approach with cases from three cities	19
1.6 Research design and thesis outline	22
References	26
2. Resilience unpacked - Framing of 'uncertainty' and 'adaptability' in long-term flood risk management strategies in the regions of London and Rotterdam	34
2.1 Introduction	35
2.2 Resilience and flood risk management: a paradigm shift or two worlds colliding?	37
2.3 The importance of policy framing	40
2.4 Methodology: Analysis of policy frames	41
2.5 The TE2100 Plan: the 'scientific pragmatism' frame	44
2.6 The Dutch Delta Programme: the 'joint fact-finding' frame	49
2.7 Discussion	54
2.8 Conclusions	55
References	57
Appendix: Overview policy documents	60
3. Between adaptability and the urge to control: making long-term water policies in the Netherlands	62
3.1 Introduction	63
3.2 Towards flood resilience: making long-term and adaptive water policies	65
3.3 Case introduction and methodology	69
3.4 The Dutch Delta Programme – an agile governance process?	73
3.5 ADM – making flexible strategies	76
3.6 Preventing lock-ins?	80
3.7 Reflections and conclusions	82
References	86
Appendix: Overview of policy documents	91

4. Decentralised implementation of flood resilience measures – a blessing or a curse? Lessons from the Thames Estuary 2100 Plan and the Royal Docks regeneration	92
4.1 Introduction	93
4.2 Flood resilience – an implementation challenge	94
4.3 The English context – enabling the implementation of flood resilience measures?	97
4.4 Analysing the implementation of the TE2100 Plan in Newham and the Royal Docks	99
4.5 The TE2100 Plan and Newham’s Royal Docks development	102
4.6 Reflection and conclusions	111
References	114
Appendix: Overview of policy documents	117
5. A strategy-based framework for assessing the flood resilience of cities – a Hamburg case study	118
5.1 Introduction	119
5.2 A more holistic perspective on flood resilience strategies	121
5.3 A strategy-based framework for assessing the flood resilience of cities	123
5.4 Methodology	128
5.5 Case study: Hamburg – A flood resilient city?	129
5.6 Conclusions	139
References	142
6. Conclusions: Planning for flood resilient cities – from promise to practice?	146
6.1 Introduction	147
6.2 Resilience – more talk than action?	149
6.3 ‘Adaptive strategies’ – a technical-rational interpretation prevails	154
6.4 ‘Stickiness’ and path-dependency	158
6.5 The growing importance of the local level	162
6.6 Final remarks and suggestions for further research	165
References	169
Samenvatting	174
Acknowledgements	182
