Antimalarial Drug Discovery: Structural Insights
Sergey Lunev

PhD Thesis
University of Groningen, The Netherlands
University of São Paulo, Brazil
May 2018

The research described in this thesis was carried out at the Structural Biology Unit, Department of Drug Design (Groningen Research Institute of Pharmacy at the University of Groningen, The Netherlands) and Unit for Drug Discovery, Department of Parasitology (Institute of Biomedical Sciences at the University of São Paulo, Brazil) and was financially supported by the University of Groningen, FAPESP, CAPES/Nuffic MALAR-ASP network and the Marie Skłodowska-Curie Grant Agreement No. 675555, Accelerated Early staGe drug discovery (AEGIS).

Printing of this thesis was financially supported by the University Library and the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, The Netherlands and Nanotemper Technologies GmbH.

Printing: Ipskamp printing, Enschede

ISBN: 978-94-034-0778-4 (Printed version)
ISBN: 978-94-034-0777-7 (Electronic version)

Layout: Sergey Lunev

Cover design: Lauren Dijkshoorn, Sergey Lunev. The image used for the cover page was generated in PyMOL molecular visualization system (Schrödinger) using the X-ray structure of malate dehydrogenase from *Plasmodium falciparum* (PDB code 5NFR, Lunev *et al.*, 2018).

Antimalarial Drug Discovery: Structural Insights

PhD thesis

to obtain the degree of PhD of the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

and

to obtain the degree of PhD of the
University of São Paulo
on the authority of the
President Prof. M. A. Zago
and in the accordance with
the decision by the College of Deans

Double PhD degree

This thesis will be defended in public on

Tuesday 29 May 2018 at 11 hours

by

Sergey Lunev

born on 1 October 1989
in Kaliningrad (Moscow Region), USSR

Supervisors

Prof. A. S. S. Dömling
Prof. C. Wrenger

Co-supervisor

Dr. M. R. Groves

Assessment Committee

Prof. A. K. H. Hirsch
Prof. W. J. Quax
Prof. D. J. Slotboom
Prof. G. Wunderlich

Paranymph(s)

Ms. L. Dijkshoorn

Mr. A. Boltjes

«Между тем как одни герои романа были убеждены в том, что время терпит, а другие полагали, что время не ждет, время шло обычным своим порядком»

И. Ильф и Е. Петров. Двенадцать стульев.

«Meanwhile, as some of the characters were convinced that there's plenty of time, and others believed that the time's running out, the time proceeded as usual»

I. If and E. Petrov. The Twelve chairs.

Table of Contents

Chapter 1.	Introduction and the scope of the thesis	3
Chapter 2.	Identification and validation of novel drug targets for the treatment of <i>Plasmodium falciparum</i> malaria: New Insights	11
Chapter 3.	Drug target validation methods in malaria - Protein Interference Assay (PIA) as a tool for highly specific drug target validation	65
Chapter 4.	Oligomeric interface as a tool in drug discovery: Specific interference with activity of malate dehydrogenase of <i>Plasmodium falciparum</i> <i>in vitro</i>	129
Chapter 5.	Crystal structure of truncated aspartate transcarbamoylase from <i>Plasmodium falciparum</i>	165
Chapter 6.	Identification of a non-competitive inhibitor of <i>Plasmodium falciparum</i> aspartate transcarbamoylase	199
Chapter 7.	Purification, crystallization and preliminary X-ray diffraction analysis of pyridoxal kinase from <i>Plasmodium falciparum</i> (PfPdxK)	221
Chapter 8.	Summary and future perspectives	239
	Samenvatting en Toekomst Perspectieven (Nederlands)	249
	Resumo e Perspectivas Futuras (Português)	255
Appendix		275
	List of publications	277
	Acknowledgements	281
	About the author	287
