ACKNOWLEDGEMENTS

I spent my late 20s doing a PhD, which is an important training to be creative and independent. I wish to thank all the people that appeared in my life during these wonderful years.

First and foremost, I would like to express my sincere gratitude to my supervisor Pascale Dijkers. She was the one who gave me the opportunity to start the project and has been supportive during the whole project. She guided me to learn *Drosophila* genetics and many other techniques. She taught me how to do a better design for experiments. Also, she helped me to improve my writing and presentation skills. I am grateful to have her as my supervisor.

I want to thank Ody Sibon who, over the years, always listened and gave good suggestions during all the meetings we had. She spent a lot of time to help me complete my thesis.

I would like to acknowledge the members of the reading committee, Professor B.J.L. Eggen, Professor E. M. Hol, and Professor D. S. Verbeek for carefully reading and evaluating this thesis.

Francesco and Wondwossen, no matter how many times I say thank you and no matter how good my English is to express my deep gratitude to you, it will never be enough! I am the only child in my family, therefore I have never known how it feels to have brothers or sisters. However, if I had brothers, they would be exactly like the two of you. You were always there to help me with my problems. You always gave me good feedback on my project, you always helped me to figure out technical problems in my experiments. And, you always cheer me up. The stickers (with strange faces, crying faces, smiley faces, and "be happy") that you put on my desk, I will keep them with me wherever I go from here.

It was great to share an office with Anita, Liza, Jan, Fra, and Wondy. I also feel lucky to work together with Roald, Nico, Balaji, Madina, Yuyi, and Hein. The atmosphere that we had, made me feel free to discuss everything. I often bothered Anita, Jan and Roald with translations of my Dutch documents. I got suggestions from Nico and Hein to improve protocols. I enjoyed the dinner that we had at Nico's place and the sushi night. I want to thank Madina, via whom I got to know Midas, who did a super nice design for my thesis cover.

I would like to thank dear Bas, who helped me with performing the screen and was always kind and patient.

The 5th floor is really a nice place to work, I enjoyed every moment I spent here. Everyone is nice and friendly. I would especially like to thank all of the following people.

Dear Harrie, I enjoyed every conversation we had, not only because of your critical comments, but also the encouragement you gave me. I wish I could have had more discussions with you.

I would like to thank Steven who gave me nice suggestions after my presentations and helped me wrestle with the confocal early in the morning.

I need to thank Despina, Matteo, Els, Eduardo, Malanie, Vaishali, Wouter and Suzanne. When I joined Lab meeting in your group, I always got good feedback.

Dear Despina, I probably did something super brilliant in my last life to have, as a reward, you as my friend in this life. You helped me a lot with solving problems with the protocol of the soluble/insoluble fraction experiment. Also, thank you so much for helping me to improve writing and presentations. The time that we were trying to finish the thesis and writing together in many different places (UMCG Library, the room on the 10th floor, Zernike study room, Central Library and Coffee Company) will always be a cherished part in my memory. Because of you, writing was not boring at all.

I would like to thank all the people in Rob's group, Peter, Cecilia, Daisy, Paola, Lara, Vivian, Julie and Yi. I had a great time with you inside and outside the lab. Thank you all for helping me doing new experiments, introducing me to new techniques and comforting me when I was upset. Peter, you are a special one, I feel I can talk to you about everything. Thank you for not getting annoyed by my "belly-harass". Cecilia, you are a beautiful one, always ready to help people. Daisy, your hard-working style has been an inspiration for me. I am lucky to have you as a true friend. I enjoyed the dinners we had.

I would like to thank Bart, Marianne, Ellie, Jeanette, Maria, Mirjam, Anne, and Hette. All the things that you helped me in the lab saved my experiments. Bart, thank you for being at my wedding, and always reminding me for the anniversary. Marianne, thank you for teaching me how to run a better blot. I like your voice; it always comforted me whenever I felt a bit sad. Also, I really enjoyed that we did run 4 miles together, twice! You inspired me to practice more!

I would like to thank Klaas, who helped me to learn how to use the confocal. Also I want to thank everyone in the DCB for all the suggestions and helpful comments I received during the DCB meetings.

From Tango, I understand the importance of being patient to concentrate on understanding what is happening and then make a movement. This can not only be applied to dance but also to do a PhD. Many thanks to dear Inez, Rob, Frank and Koen, who brought Tango into my life. You are always nice and kind. I had a lot of fun with all of you.

寫給親愛的人

親愛的爸爸和媽媽：

慈母手中綫，游子身上衣。

這些年，母親凡見到的好看的好玩的東西，都會想着給我寄來一份。衣食用品，不一而足。母親教的菜譜，足夠編輯成珍藏版家常菜食譜集。面茶，醬肘，豆泡湯。粽子，米酒，麻豆腐。各式菜肴，應有盡有。

慈父教導，應須飽經術。

這些年，和父親一起讀的書，擺滿了整個書架。父親把從前家人的紙質相片變成電子版，放在我的硬盤。書和照片都是思鄉游子的慰藉。

無論去哪裏開會，總能收到父母的祝福：望一切順利。出門旅行，總能收到父母的叮嚀：注意安全。大小節日的傳統食單，從數九到數伏的加減衣服，從沒少過父母的提醒。讓游子不管走到哪裏，都有一份此心安處是吾鄉的從容。

游子寸草心，難報三春暉。

親愛的英劍：

謝謝你的執子之手，有彼此偕老。

親愛的瀟瀟和思涵：

一起上學的日子，已經差不多是二十年前的事。當年的玩伴成了好友，好友不知不覺成了親人。不論時隔多久，我們都能無縫連接地談天說地，每次再見面都是我的期待和幸福。

謝謝你們，常去看我父母。

謝謝你們，堅守着我們的情誼。

親愛的王小姐：

謝謝你，一次次地陪我加班實驗，不管是周末，還是通宵。謝謝你，讓我們一起學了 Argentina Tango, 并一直跳着。更謝謝你，對我所有的包容。沒遇見你的話，我至今認不全五十音圖，看不下來日本語初級教材，不會用微信，不能自己剪劉海，也不知道有種好喝的茶叫苦蕎。

這個城市，有你在的時候，覺得很大。總有我們還沒去過的咖啡館，酒館和各種商店。你搬走了，這個城市就變小了。之前沒去過的地方，最終也沒有去過。

謝謝你，讓我們的關係適應所有距離和時差。不管遠近，都彼此信任。

私たちの物語はまだ続いていきますね。

親愛的翠峰姐：

我收到的明信片，大部分是你寄來的。

有你爬了五個小時的挪威布道石，有讓我和你去西西裏的科隆教堂，有你覺得我也該去看看的紐約，有祝我讀博順利的裏斯本，還有很多你說不好也不壞的地方。謝謝你，時常地惦念和問候。謝謝你，不遠萬裏來看我畢業。能做你的婦女之友是我的幸福。

親愛的鄧穎兒：

終於有機會跟你說，你是我的動力。實驗做煩了，只要看見你還在努力，就總能馬上振作起來。來加班，看見你已經放好的自行車，就覺得自己還可以更努力。謝謝你，存在本身，讓我受益匪淺。謝謝你，總毫不猶豫的幫我解決各種問題。謝謝你，教了我很多東西。謝謝你，逢年過節喊我去包餃子。帥穎，祝文章一直高產，能學能玩的繼續開心快樂。

親愛的小余哥：

謝謝你，願意跟我談實驗聊生活。謝謝你，從不計較我的各種調侃。謝謝你，對羽毛球的熱情，讓我們有機會一起打球，一起加入俱樂部，一起有了更多的回憶。祝，文章發得順利，球藝精進神速，人生處處都有 high five。

親愛的小紅姐：

四年來，一起說的最多的大概是實驗相關。
偶爾問候，“喝點熱水”和“吃點水果”，就成了獨特的溫暖。
謝謝你，在實驗室的幫忙和不尚虛華的友誼。

親愛的小吳怡：

涼雨知秋，相見恨晚。
謝謝你，督促我完成各種計劃。讓我終於看完了人生裏第一本英文書。謝謝你，願意跟我分享喜怒哀樂，也願意聽我說些有用的和沒用的建議。謝謝你，時常體貼地叫我一起吃飯，陪我各種溜達。可愛又溫柔的小姑娘，祝你一切都好。順利畢業。
