 groningen

faculty of science
 and engineering

zernike institute for
 advanced materials

The power of polymer wrapping:

Selection of semiconducting carbon nanotubes, interaction mechanism and optoelectronic devices.

Jorge Mario Salazar Rios

PhD thesis

University of Groningen, The Netherlands

Zernike Institute PhD thesis series 2018-15

ISSN: 1570-1530

ISBN: 978-94-034-0763-0 (printed version)

978-94-034-0764-7 (electronic version)

The research presented in this thesis has been carried out in the research group Photophysics & Optoelectronic of the Zernike Institute for Advanced Materials at the University of Groningen, The Netherlands. This work is part of the research program of the Foundation for Fundamental Research of Matter (FOM), which is part of the Netherlands Organization for Scientific Research (NWO). This is a publication by the FOM Focus Group *Next Generation Organic Photovoltaics*, participating in the Dutch Institute for Fundamental Energy Research (DIFFER).

Netherlands Organisation
for Scientific Research

Cover design by Tatiana Osipina with the collaboration of Daniel Alejandro Salazar Rios: The pattern is an abstract representation of the carbon honeycombs that forms the nanotubes.

The power of polymer wrapping

Selection of semiconducting carbon nanotubes, interaction
mechanism, and optoelectronic devices

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 22 June 2018 at 12:45 hours

by

Jorge Mario Salazar Rios

born on 15 August 1989
in Manizales, Colombia

Supervisor

Prof. M.A. Loi

Prof. J.C. Hummelen

Assessment Committee

Prof. P. Rudolf

Prof. E. Menna

Prof. Y.Y. Noh

Contents

Contents	i
Chapter 1 Introduction	5
1.1 The discovery of Single-Walled Carbon Nanotubes	6
1.2 Describing Single-Walled Carbon Nanotubes	7
1.3 Synthesis of Single-Walled Carbon Nanotubes	10
1.4 Selection of semiconducting Single-Walled Carbon Nanotubes	11
1.5 Polymer-Wrapped Single-Walled Carbon Nanotubes	12
1.6 Characterization of semiconducting Single-Walled Carbon Nanotube inks	15
1.7 Fabrication of field effect transistors using Single-Walled Carbon Nanotubes	16
1.7.1 Single-Walled Carbon Nanotubes field effect transistor operation and characterization	17
1.8 Single-Walled Carbon Nanotubes in solar cells	23
1.9 Thesis outline	26
1.10 References	28
Chapter 2 Understanding the Selection Mechanism of the Polymer Wrapping Technique: Toward Semiconducting Carbon Nanotubes	33
2.1 Introduction	34
2.2 Selection of s-SWNTs using conjugated polymers with different backbones	36
2.3 Simulation of the interactions between SWNT and the conjugated polymers	42
2.4 Conclusion	46
2.5 Experimental section	47

2.6	References.....	50
Chapter 3 Selecting Semiconducting Single-Walled Carbon Nanotubes with Narrow Bandgap Naphthalene Diimide-based Polymers		
3.1	Introduction.....	54
3.2	Selection of s-SWNT using diimide-based conjugated polymers	55
3.3	Influence of free polymer excess in the s-SWNT network	57
3.4	Conclusion	63
3.5	Experimental section.....	64
3.6	References.....	67
Chapter 4 Customizing the Polarity of Single-Walled Carbon Nanotube Field Effect Transistors using solution-based additives		
4.1	Introduction.....	70
4.2	Polarity control of s-SWNT field effect transistors.....	71
4.3	Study of the polarity change mechanism	77
4.4	Conclusion	83
4.5	Experimental section.....	83
4.6	References.....	87
Chapter 5 Enhancing Quantum Dot Solar Cells stability with Semiconducting Single-Walled Carbon Nanotubes interlayer		
5.1	Introduction.....	90
5.2	Results and discussion	91
5.3	Conclusion	97
5.4	Experimental section.....	97
5.5	References.....	100
Chapter 6 Are Semiconducting Single-Walled Carbon Nanotubes Promising for Industrial Applications?		
6.1	Introduction.....	104

6.2	Valorization	104
6.3	The market needs	105
6.4	Why s-SWNTs?	105
6.5	Description of the s-SWNT ink market.....	106
6.6	What is needed to use s-SWNTs for printable electronics?	106
6.7	How to implemented carbon nanotubes in the production of RFID labels?.....	107
6.8	Conclusion	108
6.9	References.....	109
	Summary	111
	Samenvatting	115
	Acknowledgment	119
	List of Publications	129
