TABLE OF CONTENTS

1. General Introduction	7
2. Not all is lost: Old adults retain flexibility in motor behavior during sit-to-stand	25
3. Physical demand but not dexterity is associated with motor flexibility during rapid reaching in healthy young adults	47
4. Old adults preserve motor flexibility during rapid reaching	75
5. Flexibility in joint coordination remains unaffected by force and balance demands in young and old adults during simple sit-to-stand tasks	97
6. General Discussion	115
7. Appendix	127
Summary	128
Samenvatting	130
Dankwoord	133
About the author	134
