PERSONALIZED TYPE 2 DIABETES TREATMENT IN PRIMARY CARE

Insights using real world data

Martina Ambrož

The studies presented in this thesis were conducted in the context of the PROMINENT project of the Groningen University Institute for Drug Exploration (GUIDE). This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 754425. The Graduate School of Medical Sciences, University of Groningen provided financial support for the printing.

Author: Martina Ambrož, Department of Clinical pharmacy and pharmacology, University Medical Center Groningen, University of Groningen

Cover: Dmytro Rykhliuk (design), Martina Ambrož (conceptual idea)

Lay-out and printing: Optima Grafische Communicatie (<https://ogc.nl>)

PERSONALIZED TYPE 2 DIABETES TREATMENT IN PRIMARY CARE

Insights using realworld data

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 31 May 2023 at 14.30 hours

by

Martina Ambrož

born on 3 November 1989
in Maribor, Slovenia

Supervisors

Prof. P. Denig

Prof. K. Hoogenberg

Co-supervisor

Dr. S.T. de Vries

Assessment Committee

Prof. E. Hak

Prof. J. Burgers

Prof. S.J.L. Bakker

CONTENTS

<i>Chapter 1</i>	Introduction	7
<i>Chapter 2</i>	Trends in HbA1c thresholds for initiation of hypoglycaemic agents: Impact of changed recommendations for older and frail patients	21
<i>Chapter 3</i>	Changes in blood pressure thresholds for initiating antihypertensive medication in diabetes patients: A repeated cross-sectional study focusing on the impact of age and frailty	41
<i>Chapter 4</i>	Less timely initiation of glucose-lowering medication among younger and male patients with diabetes and similar initiation of blood pressure-lowering medication across age and sex: Trends between 2015 and 2020	65
<i>Chapter 5</i>	Sex disparities in medication prescribing among patients with type 2 diabetes mellitus managed in primary care	97
<i>Chapter 6</i>	Sex differences in lipid profile across the life span in patients with type 2 diabetes: A primary care-based study	121
<i>Chapter 7</i>	Older age, polypharmacy, and low systolic blood pressure are associated with more hypotension-related adverse events in patients with type 2 diabetes treated with antihypertensives	145
<i>Chapter 8</i>	Willingness of people with type 2 diabetes to engage in healthy eating, physical activity and medication management	169
<i>Chapter 9</i>	Discussion	207
	Appendices	223
