Unraveling VPS13A pathways: from *Drosophila* to human

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. E. Sterken
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 14 November 2018 at 11.00 hours

by

Francesco Pinto

born on 26 June 1987
 in Milan, Italy

Supervisor

Prof. O.C.M. Sibon

Co-supervisor

Prof. S.C.D. van Ijzendoorn

Assessment Committee

Prof. G. de Haan

Prof. P. Verstreken

Prof. J.A. Kuivenhoven

In memory of my dear friend Hette Faber.
"You may be gone, but you will never be forgotten"

Table of contents

Chapter 1 Deciphering the role of VPS13A in Chorea acanthocytosis	9
Introduction	10
Aim of the thesis	18
Chapter 2 <i>Drosophila</i> Vps13 is required for protein homeostasis in the brain	25
Chapter 3 Mass spectrometry identified Galectin as a Vps13 interacting protein in <i>Drosophila</i>	61
Chapter 4 Human VPS13A is associated with multiple organelles and required for lipid droplet homeostasis	89
Chapter 5 Solving the VPS13A puzzle: conclusion and future perspectives	133
General discussions	134
Future perspectives	141
Samenvatting	147
Acknowledgements	151
