About the Author

Leonardo Salvador Arriagada Beltrán (Chile, 1986) is a Primary School Teacher from Diego Portales University with post-title degrees in Mathematics Education and a minor in Humanities. He also holds a Master's degree in Contemporary Thought: Philosophy and Political Thought from the same university. His PhD research was funded by the National Agency for Research and Development of Chile (ANID) and he is a member of the Netherlands Research School for Literary Studies (OSL). At the Nederland Digitaal 2021 Conference, Arriagada Beltrán was awarded the Noorden Digitaal Talent Award for Best Discovery and the People's Choice Award by the Dutch State Secretary for Economic Affairs and Climate Change, Mona Keijzer. He is currently an ambassador for this distinction. Arriagada Beltrán investigates aesthetically computer-generated art (CG-art) and supports the view that artificial intelligence (AI) can create art. He has executed projects from the Chilean National Fund for the Development of Culture and the Arts (FONDART), and strives to disseminate his ideas to a broader audience through public events in addition to scientific articles.
