**Emerging Opportunities to Target
Gene Transcription and DNA Repair
in Drug Discovery**

Deng Chen

The research described in this thesis was carried out in the Department of Chemical and Pharmaceutical Biology (Groningen Research Institute of Pharmacy, University of Groningen, The Netherlands) and was financially supported by the China Scholarship Council.

The research work was carried out according to the requirements of the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, The Netherlands.

Printing of this thesis was financially supported by the University Library and the Graduate School of Science, Faculty of Science and Engineering, University of Groningen, The Netherlands.

Printing: Ridderprint, www.ridderprint.nl

Cover design: Yi Guo, Xiaoyi Chen, and Deng Chen

Layout: Deng Chen

Emerging Opportunities to Target Gene Transcription and DNA Repair in Drug Discovery

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Tuesday 12 September 2023 at 12.45 hours

by

Deng Chen

born on 24 July 1991
in Sichuan, China

Supervisors

Prof. F.J. Dekker
Prof. H.J. Haisma

Assessment Committee

Prof. J.J. Schuringa
Prof. P. Olinga
Prof. J. Bernhagen

Table of Contents

CHAPTER1	Introduction and Scope of the Thesis	1
CHAPTER2	Experimental Approaches Toward Histone Acetyltransferase Modulators as Therapeutics	21
CHAPTER3	A Novel Histone Acetyltransferase Inhibitor A485 Improves Sensitivity of Non-small-cell Lung Carcinoma Cells to TRAIL.....	83
CHAPTER4	Identification of a Bromodomain-like region in 15-Lipoxygenase-1 explains its Nuclear Localization	111
CHAPTER5	4-Iodopyrimidine labeling reveals nuclear translocation and nuclease activity for both MIF and MIF2	153
CHAPTER6	Allosteric inhibitors of MIF interfere with apoptosis-inducing factor (AIF) co-localization preventing parthanatos	199
CHAPTER7	MIF-mediated homologous recombination (HR) drives ferroptosis resistance	247
CHAPTER8	Summary, Future Perspectives and Nederlandse Samenvatting	307
APPENDICES	321
