Enterococcus faecium:
from evolutionary insights
to practical interventions

Xuewei Zhou

The research was partly supported by:

- the INTERREG V A funded project EurHealth-1Health (202085), which is part of a Dutch-German cross-border network supported by the European Union, the Dutch Ministry of Health, Welfare and Sport (VWS), the Ministry of Economy, Innovation, Digitalisation and Energy of the German Federal State of North Rhine-Westphalia and the German Federal State of Lower Saxony
- the INTERREG IV A funded project EurSafety Health-net (III-1-02=73) part of a Dutch-German cross-border network supported by the European Commission, the German Federal States of Nordrhein-Westfalen and Niedersachsen, and the Dutch provinces of Overijssel, Gelderland, and Limburg.

The printing of this thesis was financially supported by the Division “Microbial Typing” of the KNVM, the Graduate School of Medical Sciences and the INTERREG IV/V A projects EurHealth-1Health and EurSafety Health-net. Their support is highly appreciated.

TABLE OF CONTENTS

Chapter 1	Introduction	7
Chapter 2	<i>Enterococcus faecium</i> : from fundamental insights to practical recommendations for infection control and microbiological diagnostics <i>Submitted</i>	15
Chapter 3	Epidemiology of Extended Spectrum β -lactamase-producing <i>E. coli</i> and vancomycin-resistant enterococci in the Northern Dutch-German cross- border region <i>Frontiers in Microbiology-Evolutionary and Genomic Microbiology 2017 Oct 5;8:1914</i>	49
Chapter 4	Algorithm for pre-emptive glycopeptide treatment in patients with haematologic malignancies and an <i>Enterococcus faecium</i> bloodstream infection <i>Antimicrobial Resistance and Infection Control 2013 Sep 11;2(1):24</i>	79
Chapter 5	Evaluation of the Xpert <i>vanA/vanB</i> assay using enriched inoculated broths for the direct detection of <i>vanB</i> VRE <i>Journal of Clinical Microbiology 2014 Dec;52(12):4293-7</i>	103
Chapter 6	Diagnostic evasion of highly-resistant microorganisms: a critical factor in nosocomial outbreaks <i>Frontiers in Microbiology-Antimicrobials, Resistance and Chemotherapy 2017 Nov 3;8:2128</i>	115
Chapter 7	Elucidating vancomycin-resistant <i>Enterococcus faecium</i> outbreaks: the role of clonal spread and movement of mobile genetic elements. <i>Accepted for publication in Journal of Antimicrobial Chemotherapy</i>	129
Chapter 8	Summary, conclusion & discussion and future perspectives	151
Chapter 9	Nederlandse samenvatting Dankwoord Biografie/Biography	165
