## Acknowledgements

This PhD journey has not been an easy one. It has taken longer than expected, gone in directions I did not foresee, and been frustrating in many, many ways. Nevertheless, it has been a great one, and that is thanks to the people that I met in every step of the way. Thank you to all of you, for your time, for your support, and most of all, for being there. It has been a privilege to meet every single one of you.

Thank you to my assesment commitee, Prof. Michael Biehl, Prof. Enrique Alegre and Prof. Javier González for taking the time and effort of reviewing my manuscript, and for your thoughtful feedback.

Special thanks to the secretaries in the Bernoulli Institute, you have been indescribably kind and helpful for the five years that I have been around. Without you the whole institute falls apart.

Of course, from a very practical point of view, this dissertation would not have come to be without my promotors. Thank you, *Nicolai*, for (trying to) teach me how to take things more easily, and not worry about stuff I cannot do anything about. Your calm approach to every situation is really life goals. Thanks, *Michael*, for all your time and your stories, for always lending a helpful hand, and, most of all, for introducing me to Terry Pratchett. Special thanks to *Nicola*, for being there every step of the way through tears, breakdowns and rejections, and for not letting me quit the thousand times I threatened to do so. Thank you too for all the happy times, and for everything you have taught me. This dissertation is as yours as it is mine, although I claim the whole credit for the Oxford commas.

Thanks to my *colleagues in Bernoulliborg*, the ones that were there to welcome me when I first got to Groningen, the ones who arrived with me, and the ones who came afterwards. Thanks too to the senior colleagues who always had a word of advice.

Thanks to *those who became friends*, for all the dinner parties, the noodles, the dumplings and the barbecues. Thanks for the philosophical discussions, for listening to the endless rants, for all your help with everything, for the laughs and for the tears. Thanks for being my home away from home.

Thank you also to *my colleagues* in NielsenIQ, who have been patient and supportive, and with whom I have already learned many new things. From now on I will show up to work less tired, but I will complain exactly the same.

As everyone who has met me can corroborate, this could not have been possible without my supportive partner *Abel*, gently pushing me to go on, work harder, and procrastinate a bit less. Thanks for everything. Thanks also to my cat, *Bilbo*, who actively contributed to this thesis by walking on my keyboard. Brilliant ideas are probably his, the typos are all my own.

*Por supuestu, esto nun hubiere sio posible tampoco ensin el sofitu de la mi familia dende Asturias. Gracias a toos por manteneme siempre bien surtía de fabes, lomo, jamón, chorizos, bonito y turrón de chocolate. Gracias a la mi hermana Marta por aguantame, y a los mis güelitos por preocupase (demasiáo) por mi a toles hores. Nun vos preocupéis que ya nun marchu más.*

I would also like to thank my wonderful paronymph, *Ahmad*, one of the first people I met in Groningen, and who has become a good friend over the years. Finally, it is only proper that this dissertation ends exactly as it started, and that is with my other paronymph, *Estefanía*. Thank you, this was all your fault.
