# **Reversible Suppression of Hemostasis in Hibernation and Hypothermia**

Edwin L. de Vrij

## Reversible Suppression of Hemostasis in Hibernation and Hypothermia

The research presented in this thesis was mainly conducted at the Department of Clinical Pharmacy and Pharmacology of the University of Groningen. This thesis would not have existed without the help of many collaborators and sponsors. This MD/PhD project and printing of this thesis were financially supported by:

*De Cock en Hadders Foundation*

PhD thesis

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 27 February 2019 at 16.15 hours

by

**Edwin Lammert de Vrij**

born on 28 November 1988  
in Leeuwarderadeel

**Supervisor**

Prof. R.H. Henning

**Paranymphs**

M. Goris

**Co-supervisor**

Dr. H.R. Bouma

Dr. R. Mulder

**Assessment Committee**

Prof. S. Cooper

Prof. K. Meijer

Prof. N.P. Juffermans

## CONTENTS

<b>Chapter 1</b>	<b>General introduction</b>	<b>11</b>	<b>Appendices</b>	<b>Nederlandse samenvatting</b>	<b>208</b>
	Thrombosis: a major cause of death and global disease burden	12		List of contributing authors	214
	Normal hemostasis	12		About the author	219
	Pathological hemostasis	16		List of publications	220
	Hemostasis in hypothermia	19		Acknowledgements	222
	Mammalian hibernation: a unique natural model of suppressing hemostasis	20			
	Aim of this thesis	23			
<b>Chapter 2</b>	<b>Platelet dynamics during natural and pharmacologically induced torpor and forced hypothermia</b>	<b>31</b>			
<b>Chapter 3</b>	<b>Mechanisms and dynamics of anticoagulation in hibernation - a cool way to suppress hemostasis</b>	<b>61</b>			
<b>Chapter 4</b>	<b>Reversible thrombocytopenia during hibernation originates from storage and release of platelets in liver sinusoids</b>	<b>85</b>			
<b>Chapter 5</b>	<b>Hypothermia associated thrombocytopenia is governed in rodents by reversible platelet storage in liver sinusoids</b>	<b>109</b>			
<b>Chapter 6</b>	<b>Temperature dependent platelet shape changes through tubulin polymerization in hibernating and non-hibernating mammals</b>	<b>139</b>			
<b>Chapter 7</b>	<b>General Discussion</b>	<b>169</b>			
	Summary	170			
	Suppression of hemostasis in hibernating hamster compared with other hibernators	174			
	Suppression of hemostasis in hypothermia in non-hibernators	187			
	Future perspectives	191			
	Conclusions	197
