Contents

Chapter 1	
General introduction	9
Chapter 2	
Development and validation of a clinical prediction tool to estimate the individual risk of depressive relapse or recurrence in individuals with recurrent depression	21
Chapter 3	
Beliefs about the causes of depression and recovery and their impact on adherence, dosage, and successful tapering of antidepressants	37
Chapter 4	
Effectiveness of preventive cognitive therapy while tapering antidepressants versus maintenance antidepressant treatment versus their combination in prevention of depressive relapse or recurrence (DRD study): a three-group, multicenter, randomized controlled trial	53
Chapter 5	
Cost-effectiveness, cost-utility, and budget impact of antidepressants versus preventive cognitive therapy with or without tapering antidepressants	77
Chapter 6	
No sustainable effects of an Internet-based relapse prevention program over 24 months in recurrent depression: primary outcomes of a randomized controlled trial	97
Chapter 7	
Economic evaluation of an Internet-based preventive cognitive therapy with minimal therapist support for recurrent depression: results of a randomized controlled trial	111
Chapter 8	
General discussion	129
References	145
Nederlandse samenvatting	163
Dankwoord	171
Publication list	177
