Zernike Institute PhD thesis series 2023-21

ISSN: 1570-1530

The work described in this thesis was performed in the research group Physics of Nanodevices of the Zernike Institute for Advanced Materials at the University of Groningen, the Netherlands. This work was supported by NanoLab NL and the Zernike Institute for Advanced Materials. This work originates as part of the research programme Skyrmionics of the Foundation for Fundamental Research on Matter (FOM), and falls as of April 1, 2017 under the responsibility of Netherlands Foundation of Scientific Research Institutes (NWO-I) (NWO-I), which is part of the Dutch Research Council (NWO).

# Towards two-dimensional magnon transport in ultrathin magnetic insulator films

**PhD thesis**

to obtain the degree of PhD at the  
 University of Groningen  
 on the authority of the  
 Rector magnificus Prof. C. Wijmenga,  
 and in accordance with  
 the decision by the College of Deans.

This thesis will be defended in public on  
 Tuesday 19 September 2023 at 12:45 hours

by

**Xiangyang Wei**

born on 14 march 1994  
 in Baoji, China

**Supervisors**

Prof. B. J. van Wees

Prof. M. V. Mostovoy

**Assessment committee**

Prof. R. A. Duine

Prof. F. Casanova

Prof. G. Palasantzas
