 groningen**

**faculty of science
 and engineering**

**zernike institute for
 advanced materials**

Zernike Institute PhD thesis series 2023-10

ISSN: 1570-1530

The work described in this thesis was performed in the research group Theory of Condensed Matter of the Zernike Institute for Advanced Materials at the University of Groningen, the Netherlands. This work was supported by NWO, Vrije FOM-programma 'Skyrmionics'.

Unconventional Magnetic States and Defects

PhD thesis

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 Rector Magnificus prof. dr. ir. J.M.A. Scherpen,
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

dinsdag 17 oktober 2023 om 11:00 uur

door

Evgenii Barts

geboren op 15 juli 1993
 te Polovinnoye, Kurgan Region, Russia

Supervisors

Prof. dr. M. V. Mostovoy

Prof. dr. T. Banerjee

Assessment committee

Prof. dr. J. van den Brink

Prof. dr. R. A. Duine

Prof. dr. ir. B. J. van Wees

to every night and every morn

Contents

1	Introduction	1
1.1	Advancements in magnetic memory devices by unconventional magnetic states	1
1.2	Topological defects in magnets	2
1.2.1	Topological solitons in three dimensions	7
1.2.2	3D Skyrmion charge	9
1.3	Magnetostatics of magnetic bubbles in thin films	10
1.4	Chiral and achiral interactions favoring non-collinear spin orders	14
1.5	Microscopic origin of magnetic interactions	17
1.5.1	Isotropic spin exchange interactions	17
1.5.2	Anisotropic exchange interactions	20
1.5.3	Single-ion anisotropy	22
1.6	Numerical methods	22
1.6.1	Landau-Lifshitz-Gilbert equation for Heisenberg spins	22
1.6.2	Glauber dynamics for Ising spins	23
1.6.3	Stochastic gradient energy optimization	23
1.7	Thesis outline	24
2	Magnetostatic Skyrmion bubbles in strongly anisotropic ferromagnetic thin films	27
2.1	Introduction	27
2.2	Magnetic model	29
2.3	Metastability of skyrmions	30
2.4	Phase diagrams in oblique magnetic fields	34
2.5	Discussion	36
2.6	Appendix	36

2.6.1	Numerical simulations	36
2.6.2	Variational bubble solution	37
3	Magnetic particles and strings in iron langasite	41
3.1	Introduction	41
3.2	Effective model	43
3.3	Phase diagram	47
3.4	Topological magnetic defects in two spatial dimensions	49
3.5	2D vortices in applied fields	52
3.6	3D Skyrmion	52
3.7	Variational solution of 3D skyrmion	55
3.8	Outlook and Discussion	56
3.9	Appendix	57
3.9.1	Numerical simulations.	57
3.9.2	Microscopic description of exchange interactions.	58
3.9.3	Lifshitz invariants.	59
3.9.4	Field-induced phase transitions.	60
3.9.5	Two-dimensional topological defect.	62
4	Anisotropic exchange interactions in CrI_3	63
4.1	Introduction	64
4.2	JKT model	65
4.2.1	Isotropic Heisenberg exchange J	66
4.2.2	Out-of-plane anisotropic exchange K	69
4.2.3	Off-diagonal exchange Γ	71
4.3	Long-range exchange electron interactions	75
4.3.1	Effective dd model	77
4.3.2	Electron energy bands of the iodine's p orbitals	78
4.3.3	Spin Hamiltonian for long-range interactions	80
4.4	Next-nearest-neighbor DMI and magnon Dirac energy gap	83
4.4.1	The Dirac magnon gap	83
4.4.2	DMI as origin of the Dirac magnon gap	85
4.4.3	Calculation of the DMI vector	86
4.5	Single-ion anisotropy and magnon energy gap at the Γ point	87
4.5.1	Origin of the zone-center magnon energy gap	87
4.5.2	The single-ion anisotropy constant	88
4.6	Realistic spin model and magnon energy spectrum	92
4.7	Discussion	97
4.8	Appendix	99
4.8.1	Symmetry arguments for hopping amplitudes	99

4.8.2	dd amplitudes symmetry	101
4.8.3	Parameters of dp model	101
4.8.4	Exchange interactions for arbitrary spin projections of Cr ions	104
4.8.5	Spin-orbit coupling on ligand sites	105
4.8.6	Diagonalization of Hamiltonian describing one hole on two ligand ions	106
4.8.7	Diagonalization of ss Hamiltonian	111
5	Magnetically-induced electric polarization peaks in ferrimagnetic multiferroic $\text{Fe}_{2-x}\text{Zn}_x\text{Mo}_3\text{O}_8$	113
5.1	Introduction	113
5.2	Ising model	116
5.3	Heisenberg-Ising model	121
5.4	Discussion	130
5.5	Appendix	130
5.5.1	Field sweeps in the Ising model	130
5.5.2	The Ising model with three interplane couplings	132
	Bibliography	132
	Summary and Outlook	150
	Popular Summary	154
	Samenvatting	158
	Acknowledgements	162
	Publications	165
	Curriculum Vitae	166
