## Acknowledgment

Between the twelfth and thirteenth floors, there is a large square window. It seems like a huge picture frame, placing the four seasons in it. Every time I walk by, I can't help but look out the window and enjoy a moment of beauty. You can always find Martini tower and Prince Garden in it and dressed up by the different colours. Vibrant green in summer, golden orange in autumn, ash white in rainy days and gorgeous colours gifted by sunset. I bet this is one of the best views in Groningen! This year, I won't be able to see shrub in Prinsentuin covered with snow.

Four years ago, I came to Groningen in autumn with a tremble heart full of anticipation. Four years later, I've met so many people along this unforgettable journey. I would like to take this opportunity to express my gratitude to all of you.

First of all, I want to express my deepest gratitude to **Romana**. Thanks for giving me the opportunity to start PhD in your group. That's how my story begins. I'm so lucky to have you as my supervisor who is always positive about everything, working hard days and nights, and sharing own experiences to encourage and comfort me. You are always curious and excited about the experimental results and new ideas. You can always find a simple way to describe complex things including hardcore physics. You always encourage and support us to seize every opportunity. You're such a wonderful supervisor! :D

I would like to express my sincere gratitude to the members of the reading committee of my thesis: **Prof. Dimtry Budker**, **Prof. John LaCava** and **Prof. Wiktor Szymanski**. Thank you for your time and valuable comments on my thesis! I also appreciate **Dr. Adéla Melcrová** and **Dr. Edith Mawunya Kutorglo** for agreeing to be opponent members of my defense.

Over the past four years, I'm so honoured to work with dear colleagues from our

shinning diamond family. **Aldona**, my co-supervisor, thanks for helping me fit in the diamond group quickly. You're always working hard and be enthusiastic about science. **Linyan**, you're not only an optimistic person but also working hard and determined. Look forward to meeting you every time in the future. **Neda**, we always share the same office. I enjoyed the casual chatting between us. **Yuchen**, you're the best photographer in our group. **Rokshana**, you're a very nice person and always willing to help other people. **Robin**, my first student, you're smart and active. I hope your dream will come true and become a physician in the future. I also want to appreciate other previous colleagues for your support and engagement: **Viraj, Sandeep, Charles, Kiran, Yori, Aryan, Thamir, Citra, Thea, Daniel, Julia**. Wish you all the best!

Many thanks go to our current group members! **Alina**, it's my great pleasure to work with you. You're a versatile scientist in my heart. I'm pretty sure you will achieve more and you deserve it! **Claudia**, your smile is like a blooming flower in spring. I love those fantastic pictures you designed for the scientific paper. **Ari**, I'm impressed by your passion on Chinese culture. **Runrun**, we came to the group together and spent PhD life together. Thank you for your company and great support. **Arturo**, an energetic dancer. You can always easily make people happy. **Britt**, you're an amazing person full of energy! **Elkin**, you're always committed to work and your family. I enjoyed working with you. **Mohammad Reza**, an optical expert. Thanks for your input from different field. **Nuan**, you're a hard-working person and I'm impressed by how you finished all the stuff in such a short time. **Xixi, Elsa, Adela** and **Huiting**, good luck on your future work! **Felipe**, welcome back to the group. It's nice to see you again.

Special thanks to my paranymphs. **Siyu**, the meaning of life lies in the mutual illumination between individuals. You light up my life :) Wish you and **Hao** all the best! **Willem**, I can always count on you whenever I need help. You're always serious about

science and easy-going in daily life. Wish you and **Simone** always be happy!

I won't be able to finish my PhD without the great support from Biomedical Engineering Department (BME) led by **Prof. Helder Santos**. I appreciated all valuable input and discussions from academic staff: **Henk, Henny, Yijin, Inge, Patrick, Prashant, Theo, Brandon, Ali, Jelmer** and **Sarthak**. I also want to thank all the technicians: **Wytse, Wya, Willy, Sonja, Ina, Jelly, Gésinda, Betsy, Joop, Ed, Hans, Reinier, Willem, Rene, Paulien, Marja** and **Emma** for your continuous support during the daily work.

I want to sincerely thank the **Chinese Scholarship Council** for offering me this great opportunity to pursue PhD degree in the University of Groningen. I also want to thank my master supervisor **Prof. Zhiyuan Zhong** and **Assoc. Prof. Huanli Sun** for your serious research attitude and critical thinking.

To my dear husband, **Kaiqi**. "Some of us get dipped in flat, some in satin, some in gloss. Every once in a while, you find someone who's iridescent, and when you do, nothing will ever compare." 斯人若彩虹，遇上方知有。With you by my side, I've never been jealous of anyone else.

Finally, I want to thank my **parents** and my **grandma**. I terribly missed all of you during the last four years. Thank you for your endless love, support and dedication, so that wherever I am, I always have a warm place to share my joys and sorrows.
