Time flies so fast. Until I finished my thesis, I could still hardly believe that I am about to finish my PhD career. I would like to thank all those who have supported me sincerely and helped me through this challenging and growing journey. Your encouragement and dedication have been an integral part of my success.

First of all, I would like to thank my supervisor **Prof. Ben L. Feringa**, for giving me the opportunity to be a member of Feringa Lab. Dear **Ben**, your passion for science has deeply affected me. I still clearly remember the first time we met in ECUST, when I presented my research to you and hoped to get a PhD position in your group, you asked me a question: "Why?" I just said that I worked hard. But you told me that while working hard is important, it's also important to be "work smart." I feel fortunate that I finally got this chance to work on the beautiful photoclick chemistry in your group. I am truly grateful for the guidance and research freedom you have given to me. Whenever I tell you about a discovery, even a quite small one, your face is always excited, and you encouraged me to learn more deeply, and this support motivates me. Sometimes, I am really sorry that I pushed you a lot to read my papers. You always told us to find a chemist hero of our own. **Ben**, I can tell you in no uncertain terms now that you are my hero and you are the best supervisor in the world. I am extremely lucky to be your student, and your passion for science and work and attention to detail will continue to influence my future life.

Dear **Wiktor**, the first and the only Full Professor of Photopharmacology and Imaging, I want to extend my heartfelt gratitude to you. Without your guidance and support, I couldn't have reached this point. Your role in teaching me the fundamental principles of photochemistry and biochemistry has been instrumental, and your unwavering willingness to engage in discussions and promptly address my inquiries, often with remarkable speed (as I always said, much like our ultrafast photoclick), has been invaluable.

I am deeply honored and profoundly grateful for the opportunity to work with you. Once I present some stupid ideas to you, you are always quite critical, point out the problems without hesitation, and give valuable suggestions, which has been instrumental to my ability to navigate my PhD project and complete my thesis successfully. I want to express my heartfelt gratitude to you for your invaluable guidance and support. Over the past four and a half years, you have not only been a cherished supervisor but also a dear friend. I hope you continue to achieve great heights in your career in the years ahead. Best of luck!

I would like to thank my reading committee Prof. **Thorsten Bach**, Prof. **Nathalie Katsonis**, and Prof. **Tibor Kudernac** for reading and giving suggestions on my thesis.

Dear **Nadja**, I want to express my heartfelt gratitude to you at this moment. Throughout my PhD journey, you have been one of my most reliable collaborators and friends. Whether it's offering daily supervision or assisting during challenging research bottlenecks, you consistently go above and beyond to provide invaluable insights and assistance. Your extensive professional knowledge and experience have not only helped me overcome numerous obstacles but have also ignited a deeper level of critical thinking and exploration within me.

Furthermore, I wish to convey my sincere appreciation for your mentorship in the realm of scientific research paper writing. Your guidance extends beyond the mere structure of a paper; you have patiently walked me through the intricacies of crafting clear, logically structured paragraphs and chapters. Your mentorship has propelled me to make substantial strides in academic writing, a skill that will undoubtedly have a profound impact on the trajectory of my research career. All in all, **Nadja**, I feel incredibly fortunate to have you as both a partner and a friend. Your unwavering support and mentorship hold immeasurable value for me, and I will forever treasure them.

Dear **Jeffrey**, Buter sensei, I feel quite lucky to have you as my daily supervisor when I just started my PhD study in Feringa Group (time flies so first 😊). Whenever I am in trouble, you always encourage me and offer guidance. I have learned a lot from you, especially how to guide students to carry out new research projects. The only pity thing I have is not being able to go to China with you during my PhD, even though we talked about it with **Ben** many many many times. But I firmly believe that we will make it happen in the near future. I wish you all the best for your future career.

I would like to thank my paranymphs **Annemarie** and **Yahan (雅函)** for their help and friendship.

Dear **Annemarie**, you are such a good friend and thank you so much for being my paranymph. To be honest, I was super happy when **Wiktor** told me that you were going to be the second photoclick person in our group. You are such a good young scientist. I always feel your enthusiasm when we have discussions. This is just the first year of your PhD, but you almost finished two papers, which is amazing. Dear **Annemarie**, I am sure you will have a successful PhD career, much better than mine. Best of luck!!!

Dear **Yahan**, you are such a nice girl, and I am happy to be your friend. I really like your personality, independence, attentiveness, and also guilelessness. I must say that you are probably the second-best badminton player in our group (you know who is the best, of course, **ME** 😊), I am so proud of you. **Yahan**, you are such a warm-hearted person, thank you so much for being my paranymph. I know you are also about to finish your PhD, I wish you all the best.

Dear **Tineke**, you are the great mother of the Feringa group and without a doubt, the best in the world. I appreciate all your thoughtful arrangements regarding our meetings with Ben, but even more so for your personal care and encouragement. I will forever cherish the kindness you have extended and the warm words you have shared with me. Thank you for everything you contributed to the group. I will miss you. Dear **Annette** and **Chantal**, Thanks so much for all your help, especially for making my defense happen.

Dear **Anouk**, thanks for everything you did. I really appreciate that you helped to submit my papers and push everything forward.

Dear **Jinyu** (金宇), I would like to call you: 大佬, the Chicken King and Tennis “GOAT” of the Netherlands!! The life of PhD is always full of stress and uncertainty, especially in a foreign country, so it's quite important to have a true friend to talk about everything. I must say you are such kind of friend to me, my best friend in Groningen, without a doubt. I enjoyed all of the conversations I had with you during the coffee break. We discussed from papers to new ideas to life. You inspired me a lot. You are about to start your post-doc career, and I wish you all the best in Austria. Keep in touch, my friend!!!

Dear **Qi** (琦), I always talk with my friends, saying you are one of the greatest young scientists I have ever met in my life. You are a crazy paper machine with a lot of nice publications. Meanwhile, you are an excellent friend in life, I enjoyed playing games (guan dan and mahjong) with you. Now, you and **Yuanxin** have moved back to Shanghai and built your own group. I am pretty sure you will be an excellent supervisor. I wish you a bright future, we will keep in touch, my friend!!!

Dear **Jiixin**(嘉欣), I am so happy to be your lab mate in Green Building. At the same time, as one of my wife Xing's best friends in Groningen, I really appreciate that you can stay with my wife and play Switch games with her when I am busy. Wishing you all the success and happiness in Guangzhou.

To **Shaoyu(少瑜)**, Dear **Shaoyu**, you are the real elder sister of all of the “**Chinese Feringa**” members, I appreciate all your help, care, and encouragement. Your smile and gentle voice is always a strong power to me. I still remember on my first day in Zernike, you picked me up (I'm sorry. I got the wrong door 😊) showed me around, and introduced me to other lab mates. Now, you have started a new journey in Hong Kong, and I wish you and **Qian** all the best!!!

Dear **Fan(梵)**, it is a great experience to work with you. We had so much fun. You are a great chemist. I wish you all the best for your future career.

Dear **Xiaobing(小兵)**, you are such a nice guy; I would like to call you the “**hottest**” chef in Groningen. I still can't believe that a guy from Zhejiang can make such hot food. I really enjoyed all of the dinner with you and other “**Chinese Feringa**” members. I wish you all the best with a bright future.

Dear **Guiying(桂英)**, you are such a nice girl with unparalleled manicure skills. To be honest, I was sharked when I first saw it. I'm very grateful that you made this fantastic cover for my thesis! Thanks!!!

Dear **Jinghao(靖昊)**, the Champion of “Dou Di Zhu”, you are an amazing person and a good friend. I am sure you will have a great PhD career and wish you all the best in the near future.

To **Wenbo(文博)**, Groningen's own Lei Feng, you've consistently been there for others whenever they've needed assistance. I must admit, you're the only person I've ever encountered who can match my enthusiasm for eating Chinese noodles. I deeply regret that I won't be able to attend your wedding, but I wholeheartedly wish you a joyous wedding day and a lifetime filled with happiness.

To **Yiming(一鸣)**, Dear **Yiming**, I am extremely grateful to have you as one of my best friends in Groningen. You are such a warm-hearted person. I learn a lot from you, especially how to make a really good Chinese BBQ!! Now, you have returned back to China, I wish you all the best in the near future and see you soon in China.

Dear **Ilse**, the most pretty girl in the biosubgroup. To be honest, I was shocked when I first learned that you were obsessed with Chinese costume dramas. You always ask me, "What are you going to eat for dinner?" to which I consistently reply Chinese noodles. I know it is boring, but it truly reflects my daily life. Sorry about that 😊. Time flies so fast, and you are also about to finish your PhD. I wish you to open a new chapter in your future life. All the best!

Dear **Albert**, the master of “PPG”, you are such a great synthetic chemist and I enjoyed all the conversations with you and hope you all the best and stay healthy!

Dear **George** (Alachouzos), thanks for your help with my work. I wish you all the best for your new job and future in the US.

To **Rosa, Peter, Melody, and Quentin**. Dear all, I must say, I am really lucky to have you guys as my lab mates in Green Building, and I genuinely appreciate your role in cultivating such a warm lab environment, as well as your invaluable assistance during my PhD journey. I wish you a bright future!!!

Dear **Damián**, you are a great person and chemist. I was so happy to be your lab mate (even though it was quite short), and I really enjoyed all the conversations and discussions with you. You are so kind, gentle, and friendly. Undoubtedly, you will be a great supervisor and scientist in the future. I am looking forward to seeing you in China (invite you to give a lecture 😊) and introducing various kinds of Chinese food to you as we always mentioned!

Dear Prof. **Wybren Jan Buma**, Prof. **Hong Zhang**, and Dr. **Mariangela Di Donato** thanks for all the suggestions and inputs to my research. It is an honor to work and discuss with you on very different topics. I really appreciate it. I would also like to show my great gratitude to my great collaborator, **Kefan** in Amsterdam. Dear **Kefan**, you are a great person as well as a talent scientist! We had many nice conversations! We will all keep in touch and hope to see you soon in China!

**Renze**, thanks for all your help with the HRMS measurements and HPLC training. **Pieter** and **Johan**, thanks for your kind help with NMR facilities.

In addition, I would like to thank other members and former members in Feringa Group: **Alexander, Franco, Jiawen, Ryojun, Lukas, Jaime, Romain, Niklas, Simon, Stefano, Robert, Brian, Cosima, Daisy, Marco, Anirban, Sven, Carlijn, Michal, George, Dusan, Tobias, Hugo, Piermichele, Vanda, Bianka, Paco, Ilayda, Jana, Thomas, Ainoa, Dan, Roza, Ning, Berjan, John, Michael, Diederik, Mickel**, and all. I want to express my gratitude for cultivating a harmonious and enjoyable work environment. Working alongside all of you in the group has been a pleasure, and I'm thankful for your invaluable assistance. Best wishes to all! “青山不改，绿水长流，山水有相逢，咱们江湖再会”

最后的最后，我想特别的感谢一下我的爱人-张醒。不知不觉我们以携手走过了十年的时光，这十年里我们哭过也笑过，吵过也闹过，非常感谢你一路以来的陪伴，无论是从国内到澳洲到荷兰还是到美国，有你在身边就让我有了一种天涯海角哪里都是家的感觉。亲爱的老婆，你为我们这个小小的家庭付出了太多太多，感谢你在背后默默地支持，有你是我这一生最大的幸福，愿余生我们携手相伴：执子之手，与子偕老。

Youxin Fu/付幼心
