Propositions – Stellingen – Dalil

Associated with PhD thesis

EXPLORING THE REGIONAL CHARACTERISTICS OF INTESTINAL DRUG METABOLISM AND FIBROGENESIS

1. In precision-cut tissue slices, there are clear organ and species differences in fibrogenesis. (*This thesis*)
2. Human precision-cut intestinal slices can be used to study both regional and sex differences in intestinal drug metabolism. (*This thesis*)
3. Organ, sex, and species differences should be taken into account during the search for novel therapeutic agents. (*This thesis*)
4. Don't take your organs to heaven, heaven knows we need them here. (*Somewhere on the incubator cabinet in the slicing lab*)
5. Seek knowledge from cradle to the grave. (*Muhammad, PBUH*)
6. Tell me and I forget, teach me and I may remember, involve me and I learn. (*Benjamin Franklin*)
7. Birds don't just fly, they fall down and get up. Nobody learns without getting it wrong. (*Shakira – Try Everything, Zootopia Soundtrack*)
8. Great things happen when you ask questions, and every question takes you further.
9. Go wander! So that you will know what you miss and where to return.
